

HYPER

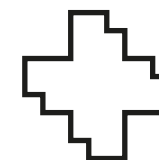

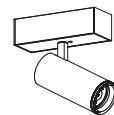

AQFORM
LIGHTING SOLUTIONS

Jeżeli wnętrze będzie się zmieniać, oświetlenie powinno dynamicznie za nim podążać. Dlatego HYPER proponuje nie tylko wysoką moc, szczególnie cenną w pomieszczeniach wystawienniczych, ale też możliwość zmiany kąta świecenia i to nawet po zamocowaniu oprawy. Kiedy dodamy do tego montaż na szynoprzewodach, które są najbardziej elastycznym systemem oświetleniowym, otrzymamy perfekcyjne oświetlenie do zadań specjalnych. W obrębie szyny z łatwością można dołożyć nowe punkty świetlne lub zmienić miejsce ich zamocowania, bez konieczności zmian w instalacji i bez uciążliwego remontu! Wystarczy jeden ruch. Zmienny kąt świecenia w zakresie 20-50° pozwoli zarówno akcentować jak i pokrywać światłem większe powierzchnie.

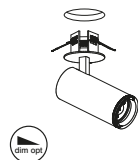

If the interior changes, the lighting should dynamically follow it. That is why HYPER offers not only high power, especially valuable in exhibition rooms, but also the possibility of changing the beam angle, even after mounting the luminaire. Adding to this an option of mounting on tracks, which are the most flexible lighting system, we get the perfect lighting for special tasks. Within the track, you can easily add new lighting points or change the place of their attachment, without the need to change the installation and without heavy renovation! It takes only one move. A variable viewing angle in the range of 20-50° will allow both to accentuate and cover larger surfaces with light.
