# Blos Pet

## *Exceptional durability & decorative character*

The BLOS collection demonstrates that a fixture with technical parameters can also have a decorative character. In surface mounting version BLOS round distance, with its high IP54 waterproof rating and IK10 mechanical resistance, excels as general lighting even in very challenging conditions.

PET in suspended version works well as effective task lighting for work surfaces – such as tables, counters or receptions. Its slender, minimalistic form serves as a discreet accent in modern interiors, while the deeply set light source safeguards the user's eyes from glare.

# Modern Glass mini

## Interior jewelry

MODERN GLASS mini combines decorative flair with excellent technical parameters. Its long, slender covers serve as a distinctive interior ornament, while its high-quality light effectively illuminates tabletops, counters or desks. This fixture works wonderfully in a home's living room, a modern restaurant or a hotel lobby.

The option to configure colour finishes and shade lengths makes MODERN GLASS mini an invitation to play with its form.

QRLED next trim recessed | SNOP 40 QRLED suspended | SNOP 40 E27 suspended

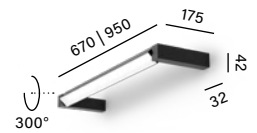

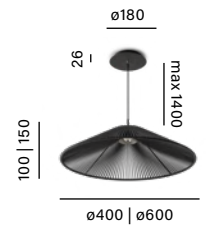

# Snop Qrled<sub>next</sub> Set Raw<sub>mini move</sub>

NEW PRODUCTS

*Choose appropriate lighting  
for a variety of visual tasks*

Illuminating a restaurant, cafe, or hotel provides designers with great freedom, thanks to loose standards and the specificity of these projects. However, there are three important dimensions to consider: a variety of possible visual tasks, efficiency for extended working hours, and the simultaneous presence of employees and visitors who have different needs due to differences in the time spent in a given space.

→ Lobby

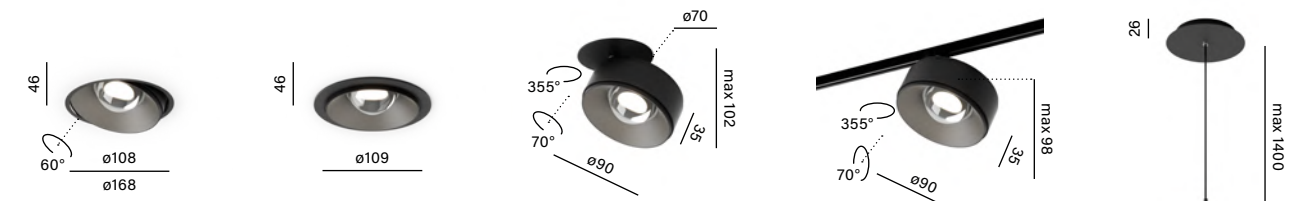

# QRLED<sub>next</sub>

NEW PRODUCTS

## Power and efficiency encapsulated in design form

QRLED is a collection that combines energy efficiency, comfort and stunning aesthetics. With enhanced technical parameters, it provides even greater efficiency and glare control. Its modern design and wide variety of models and finishes make QRLED perfect for both private and public spaces.

# FORMA

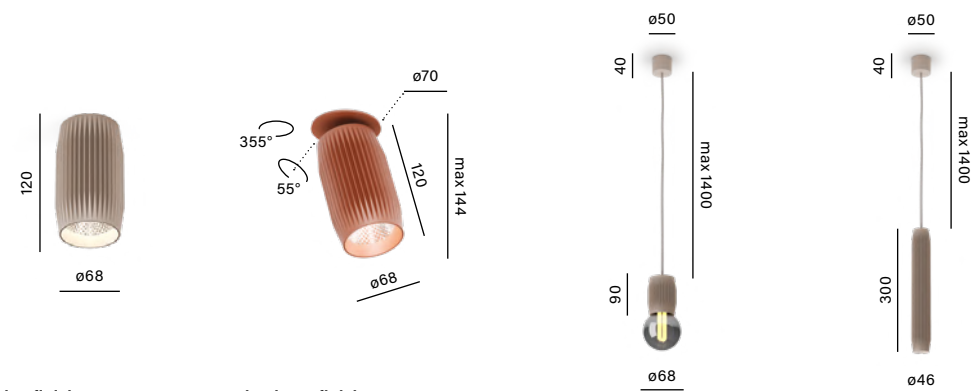

# Triba

## *Excellent parameters concealed in decorative design*

The TRIBA collection proves that decorative design can harmonize with exceptional technical specifications. Thanks to its hybrid optics and expanded shielding angle, the fixture prioritizes visual comfort while boasting extraordinary efficiency without compromising light quality. With a broad power range, various mounting options, two diameters, and a few lengths available, the fixture can flexibly adapt to the specific needs of different interiors.

# Piper

## *Explore a wide range of possibilities*

The PIPER system is based on lighting tubes suspended on thin cables, providing diffused and soft light. It allows for easy connection by using flexible, plug-in connectors. One power source on the ceiling or wall is sufficient to connect multiple fixtures. An additional advantage of the system is the ability to choose one of three colour temperature values using the switch mounted on each fixture.

# Gastronomy

*While creating an intimate atmosphere it is important to remember not to force the guests to read the menu with a mobile phone flashlight!*

# Mroom

NEW PRODUCT

## Explore a wide range of possibilities

The MROOM collection is a proposal for efficient table lighting that stands out due to its exceptional durability. Thanks to its easily replaceable battery, the passage of time does not affect it, making it suitable for commercial spaces like hotels or restaurants. MROOM features touch controlled power adjustment and one fixture can illuminate a small table for up to 4 people. Its high IP65 waterproof rating allows the fixture to be used both indoors and outdoors.

Battery life: min. 500 cycles. Replaceable battery. Charging time 8h at 2A.

# Lens Line Modern Ball

## *Exceptional parameters and timeless design*

MODERN BALL captivates with its simplicity and functionality. The milky, glass sphere conceals outstanding technical parameters, creating an exceptionally harmonious duo. As a result, the MODERN BALL collection excels as efficient and incredibly comfortable general lighting. It effectively illuminates tables in modern cafes or restaurants, emitting softly diffused, visually pleasing light.

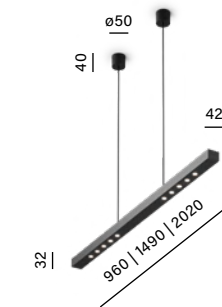

### luminaire finishes

- white
- black
- grey
- terracotta
- taupe
- gold

## *Comfortable lighting in a minimalistic form*

A simple, linear form and lens sets are the hallmark of the LENS LINE family. The version with a 54° beam angle is perfect for general lighting. The unique optics means that LENS LINE will also illuminate the walls, attract attention and give the interior character. A model with a narrower beam angle will provide more focused task lighting, e.g. above the countertop surface. Regardless of the version, LENS LINE will be a great addition to the room's decor.

# Flying Ball<sub>up&down</sub> Modern Ball Pet

*In the world of lighting, design does not end with shape*

Achieving the perfect blend of form and technology is key. The appropriate thickness of the heat dissipation material, the distance between the diode and the lens or reflector selected with surgical precision have a diametrical influence on how the light will spread. Sometimes millimeters make a difference! When designing our products, we make sure that technology aesthetically complements form and the other way round, always with a characteristic tone of minimalism.

NEW PRODUCT

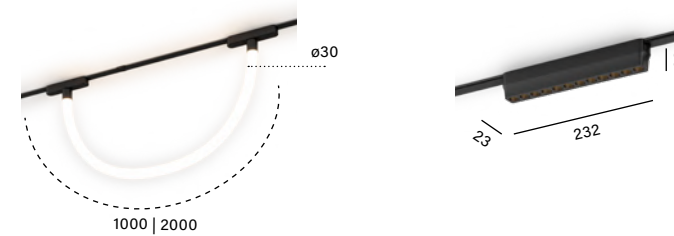

# Tube flex

# Rafter mini points

*A functional way  
to break the monotony*

If you value a touch of individualism for general lighting, TUBE flex is for you. The luminous flexible tube not only catches the eye but also gently illuminates the entire room. Create luminous compositions during design or even during installation that will add dynamism to the space.

RAFTER mini is a versatile fixture that, despite its small size, can do a lot. Thanks to high-quality reflectors, it can provide precise accent lighting, and the move versions guarantee almost unlimited freedom to direct the luminaire to any place in the interior.

**Iki** round NEW PRODUCT

*Enhance table ambiance with reliable lighting*

In some places, the ambiance matters most. A cozy restaurant or café requires appropriate lighting. Decorative IKI fixtures, created in collaboration with Andrzej Klisz, a professor at the Academy of Fine Arts in Katowice, come to the rescue in such interiors. In the LED version, the fixture emits precise task lighting, illuminating work surfaces like counters or receptions, while the IKI round E27 works wonderfully as mood lighting for tables.

# Track solutions Pet

## *Tracks – a way to achieve well-adapted lighting*

Lighting tracks are very flexible solutions. Their main advantages are powering many luminaires from one point and the ability to easily change the arrangement and number of luminaires. They are perfect for shops, galleries and restaurants, but also for residential interiors.

The MULTITRACK where the luminaire adapters are flush with the edge of the track system is available in surface-mounted, suspended and recessed versions, as well as in two depths. Available accessories and connectors allow you to create complex systems, even with a direct transition from the ceiling to the wall. There is a safe voltage of 48V inside the track, so the MULTITRACK system can also be used in places within easy reach.

# Big Size Rafter points Track solutions

*Rafter points - comfort and efficiency  
in a small form*

RAFTER mini are versatile fixtures that, despite their small size, can do a lot. The move versions guarantee almost unlimited freedom to direct the luminaire to any place in the interior. Fixtures with a reflector provide precise accent lighting, and models with a milky cover offer diffused light in a larger space. All this, in a minimalist form, which is an interesting addition to modern interiors.
