## Discover the *Brutal* collection from AQForm

Have you ever stared into a fire for too long? For us, watching a lathe at work is just as mesmerizing. Freshly processed aluminum, still warm from production, gleams with purity, revealing every detail of its transformation. In the *Brutal* collection, we embrace this raw metal, coating it with only a protective satin-clear lacquer. This finish preserves the material's authentic, industrial character, showcasing every step of its production while ensuring durability and corrosion protection.

*Brutal* features a curated selection of forms: **TRIBA, KLIVA, CONA**, and **OPTIMA**. These luminaires reveal their craftsmanship through visible marks from turning, brushing, and shaping, offering raw elegance for minimalist spaces.

# CONA

### Stylish ornament for modern designs

CONA's subtle curves are the result of metal spinning, a precise method of shaping metal on a rotating disk. Each piece carries unique marks from this process, giving it a raw character. Available in two sizes, CONA is perfect for ambient or relaxing general lighting.

**Excellent parameters  
concealed in  
decorative design**

With hybrid optics and expanded shielding, TRIBA ensures visual comfort and outstanding efficiency without compromising light quality. In the *Brutal* version, it reveals its story: the spun and then gently brushed surface showcases every stage of processing, creating a unique effect that combines industrial rawness with elegance.

TRIBA

## Atmospheric decoration

KLIVA specializes in atmospheric lighting that soothes and relaxes. Its rounded shape, with a *Brutal* finish, highlights every mark of the precise metal spinning process, giving each piece its unique identity. Suitable for both wall and ceiling, KLIVA offers gentle ambient lighting with a distinctive, raw appeal.

KLIVA

# OPTIMA

## Tailored for a perfect desk illumination

The secret of OPTIMA lies in its lighting method. The task version effectively brightens the work surface, while the up&down variant also directs light upwards, bouncing off the ceiling to provide general lighting. In the *Brutal* version, it embraces raw, authentic design without embellishments.
