# Light forms life

## No nonsense design

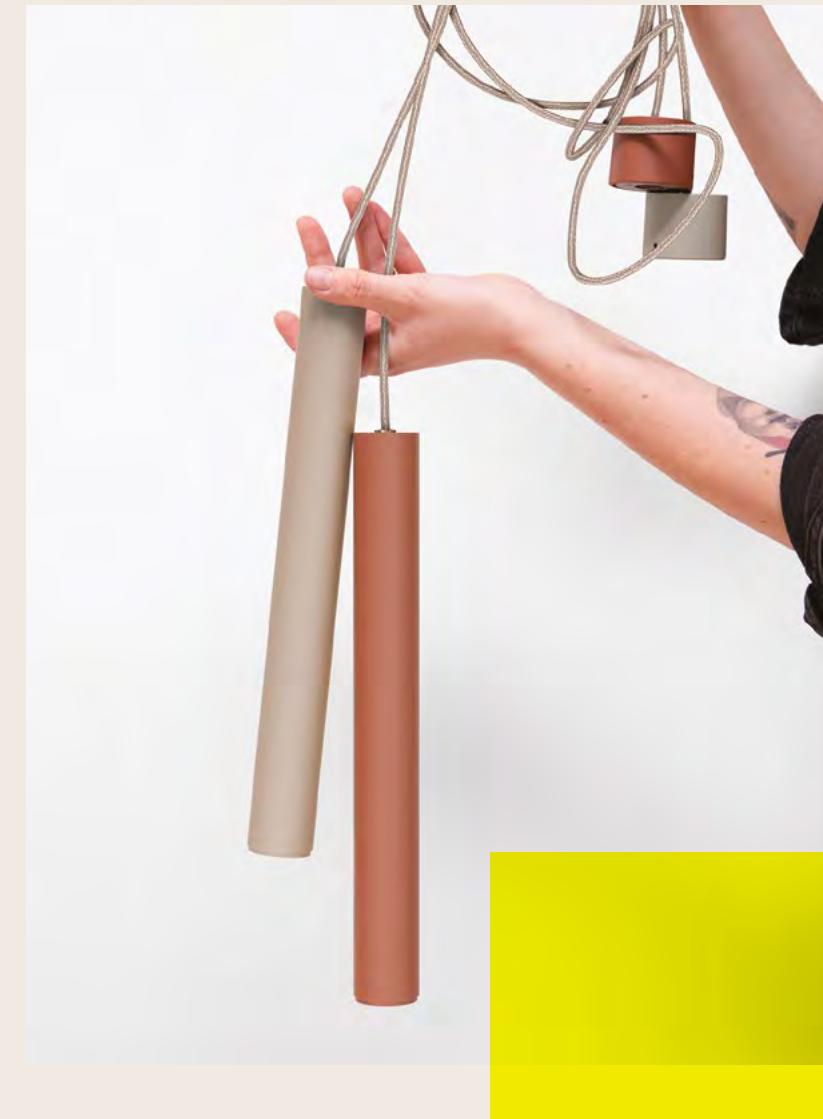

Światło we wnętrzu pełni wiele funkcji. Pomaga wyznaczyć kierunek po zmroku, tworzy nastrojową atmosferę lub wręcz przeciwnie – pobudza do pracy i pozytywnie wpływa na naszą wydajność. Dlatego od ponad 30 lat oświetlenie jest naszą pasją, którą zgłębiamy w Centrum Badawczo-Rozwojowym, zlokalizowanym w Czernichowie, nieopodal Krakowa. To tutaj zespół wyspecjalizowanych inżynierów projektuje, bada i tworzy oprawy, udowadniając, że są one czymś więcej, niż tylko nowoczesną formą. Przemyslane pod kątem funkcji, zaskakują, budzą emocje, ale przede wszystkim dodają wnętrzom wyjątkowego blasku. Zapraszamy Cię do świata nowoczesnych rozwiązań oświetleniowych!

Lighting within interiors serves various functions. It helps guide direction in the dark, creates a mood-setting atmosphere or, conversely, stimulates work and positively impacts our productivity. That is why, for over 30 years lighting has been our passion, explored at the Research and Development Center located in Czernichów, near Krakow. Here, a team of specialized engineers designs, researches and creates fixtures, proving that they are more than just modern forms. Thoughtfully designed for functionality, they surprise and above all, add a unique brilliance to interiors. Welcome to the world of modern lighting solutions!

# Our story

Czy wiesz, że korzenie naszej firmy sięgają 1992 roku, kiedy to specjalizowaliśmy się... w produkcji mebli? I choć od tamtej pory wiele się zmieniło, wciąż stawiamy na bezkompromisową jakość naszych produktów. Zanim przejdziesz do kolejnej części katalogu, pełnej inspiracji oraz nowoczesnych rozwiązań oświetleniowych, poznaj kilka ciekawostek o naszej marce!

Did you know that our company's roots date back to 1992, when we specialized... in furniture production? And although much has changed since then, we still prioritize the uncompromising quality of our products. Before you move on to the next section of the catalogue, full of inspiration and modern lighting solutions, let's discover a few interesting facts about our brand!

## RFTER points

RFTER to rodzina wyspecjalizowanych opraw o niezwykle szerokich możliwościach. W wersji points pełni funkcję skutecznego oświetlenia zadaniowego, gwarantującego najwyższy komfort wizualny.

RFTER is a family of specialized fixtures with incredibly broad capabilities. In the points version, it serves as effective task lighting, ensuring the highest visual comfort.

## AQfelt OVALL BALL

Kolekcja AQfelt to funkcjonalne rozwiązania, które zapewnia nie tylko właściwe oświetlenie, ale również odpowiedni komfort akustyczny we wnętrzu.

The AQfelt collection is a functional solution that provides not only proper lighting but also adequate acoustic comfort within interiors.

## IKI

IKI zachwyca przestrenną formą w postaci charakterystycznych, ażurowych paneli podkreślających opływające je światło. Kolekcja powstała we współpracy z Andrzejem Kliszem, profesorem Akademii Sztuk Pięknych w Katowicach.

IKI captivates with its spatial form represented by distinctive, openwork panels that highlight the light flowing through them. The collection was created in collaboration with Andrzej Klisz, a professor at the Academy of Fine Arts in Katowice.

- Nasze oprawy oświetleniowe powstają w Centrum Badawczo-Rozwojowym liczącym blisko 3600m<sup>2</sup>.

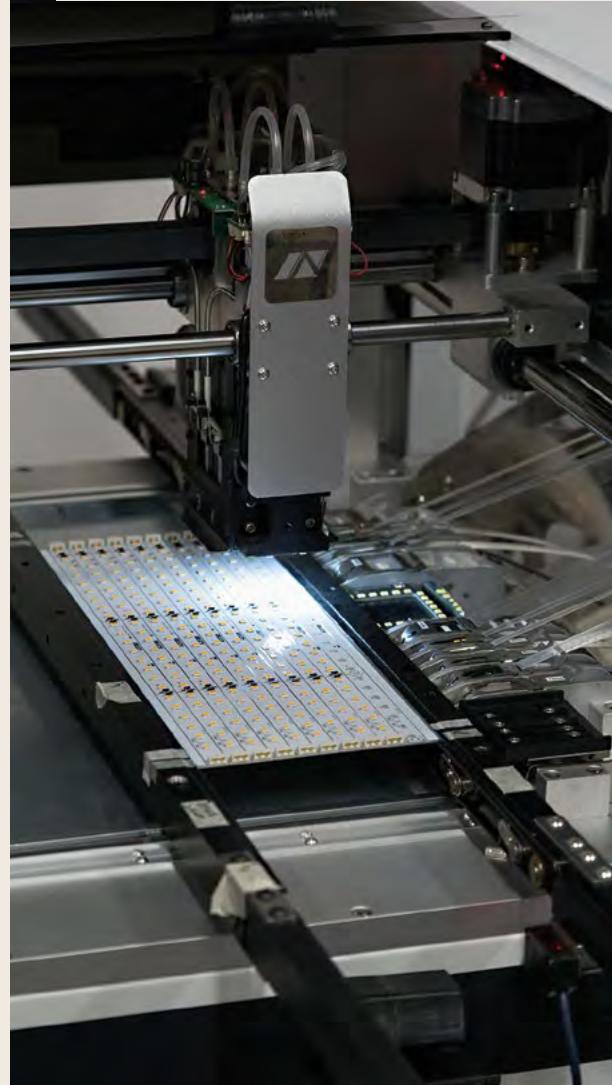

- Zespół wyspecjalizowanych inżynierów opracowuje produkty od pomysłu do wdrożenia.

- Oprawy produkowane są w naszej fabryce w Czernichowie pod Krakowem.

- Our lighting fixtures are developed at the Research and Development Center spanning nearly 3600m<sup>2</sup>.

- A team of specialized engineers works on products from concept to implementation.

- The fixtures are manufactured in our factory located in Czernichów near Krakow.

• W naszej ofercie znajdziesz cały wachlarz opraw standardowych i niestandardowych, odpowiadających na większość potrzeb przestrzeni prywatnych i publicznych.

• Nasze produkty zostały nagrodzone w wielu konkursach, m.in. iF, Red Dot, German Design, must have i Dobry Wzór.

• Nie straszne nam wyzwania! Oferujemy możliwość modyfikacji standardowych produktów na potrzeby konkretnego projektu. Zespół naszych specjalistów pozostaje otwarty na współpracę.

• Our offer includes a full spectrum of standard and custom fixtures catering to various needs in private and public spaces.

• Our products have been awarded in numerous competitions, such as iF, Red Dot, German Design, must have and Good Design.

• Challenges do not deter us! We offer the option to modify standard products to suit specific project needs. Our team of specialists is open to collaboration.

# Created for you

Współpraca z projektantami to istotny element w procesie powstawania naszych produktów. Pozwala stworzyć oprawy, które nie tylko dobrze wyglądają, ale przede wszystkim są funkcjonalne. Dzięki temu mogą stać się stylową ozdobą wnętrza, zapewniając jednocześnie oświetlenie najwyższej jakości. To doskonały dowód na to, że technologia i design tworzą razem wyjątkowo zgrany duet!

Collaboration with designers is a crucial element in the creation process of our products. It allows us to develop fixtures that not only look great but, above all, are functional. Consequently, they are stylish interior decorations while providing top-quality lighting. It is a perfect demonstration that technology and design together create an exceptionally harmonious duo!

# Office

Oprawy zaprojektowane z myślą o pracy w biurach wyróżniają szczególne parametry. Pomagają w skupieniu oraz pozytywnie wpływają na nasze samopoczucie. Dzięki temu, odpowiednio dobrane, mogą nie tylko stanowić wyrazisty duet z pozostałymi elementami aranżacji, ale przede wszystkim dbać o wydajność i komfort pracowników.

Fixtures designed for office work boast specific parameters. They help with concentration and positively impact our well-being. Appropriately chosen, they not only create a distinct harmony with other design elements but also prioritize the efficiency and comfort of employees.

## Retail

Oprócz wysokiej jakości, nasze oprawy wyróżnia duża wszechstronność i elastyczność. Dzięki temu świetnie sprawdzą się w przestrzeniach ekspozycyjnych takich jak sklepy, salony czy butiki. Doskonałe parametry techniczne wydobędą z oświetlanych przedmiotów to, co najlepsze, a minimalistyczne wzornictwo opraw dopełni całości aranżacji.

Aside from high quality, our fixtures stand out for their versatility and flexibility. This makes them ideal for exhibition spaces such as shops, showrooms, or boutiques. Excellent technical parameters will bring out the best in illuminated items, while the fixtures' minimalist design will complement the overall arrangement.

# What about

W katalogu znajdziesz cały wachlarz wyspecjalizowanych rozwiązań zaprojektowanych z myślą o przestrzeniach prywatnych i komercyjnych. Wśród nich odświeżone modele z popularnych kolekcji oraz zupełnie nowe propozycje opraw o dekoracyjnym charakterze. Daj się zaskoczyć ich szeroką funkcjonalnością!

In the catalogue, you will discover a full range of specialized solutions designed for private and commercial spaces. Among them, refreshed models from popular collections and completely new propositions of decorative fixtures. Let yourself be surprised by their wide functionality!

PRODUKT

# What is new

W nowej ofercie znajdziesz jeszcze więcej opraw dekoracyjnych o parametrach typowych dla oświetlenia architektonicznego. Nie zabraknie też nastrojowego oświetlenia, które doda wnętrzu wyjątkowego blasku oraz sprawdzonych rozwiązań w zaktualizowanej wersji.

In the new offer, you will find an expanded selection of decorative fixtures with specifications typical for architectural lighting. There will also be ambient lighting to add a unique glow to the interior and proven solutions in updated versions.

NOWY POTRÓJNY

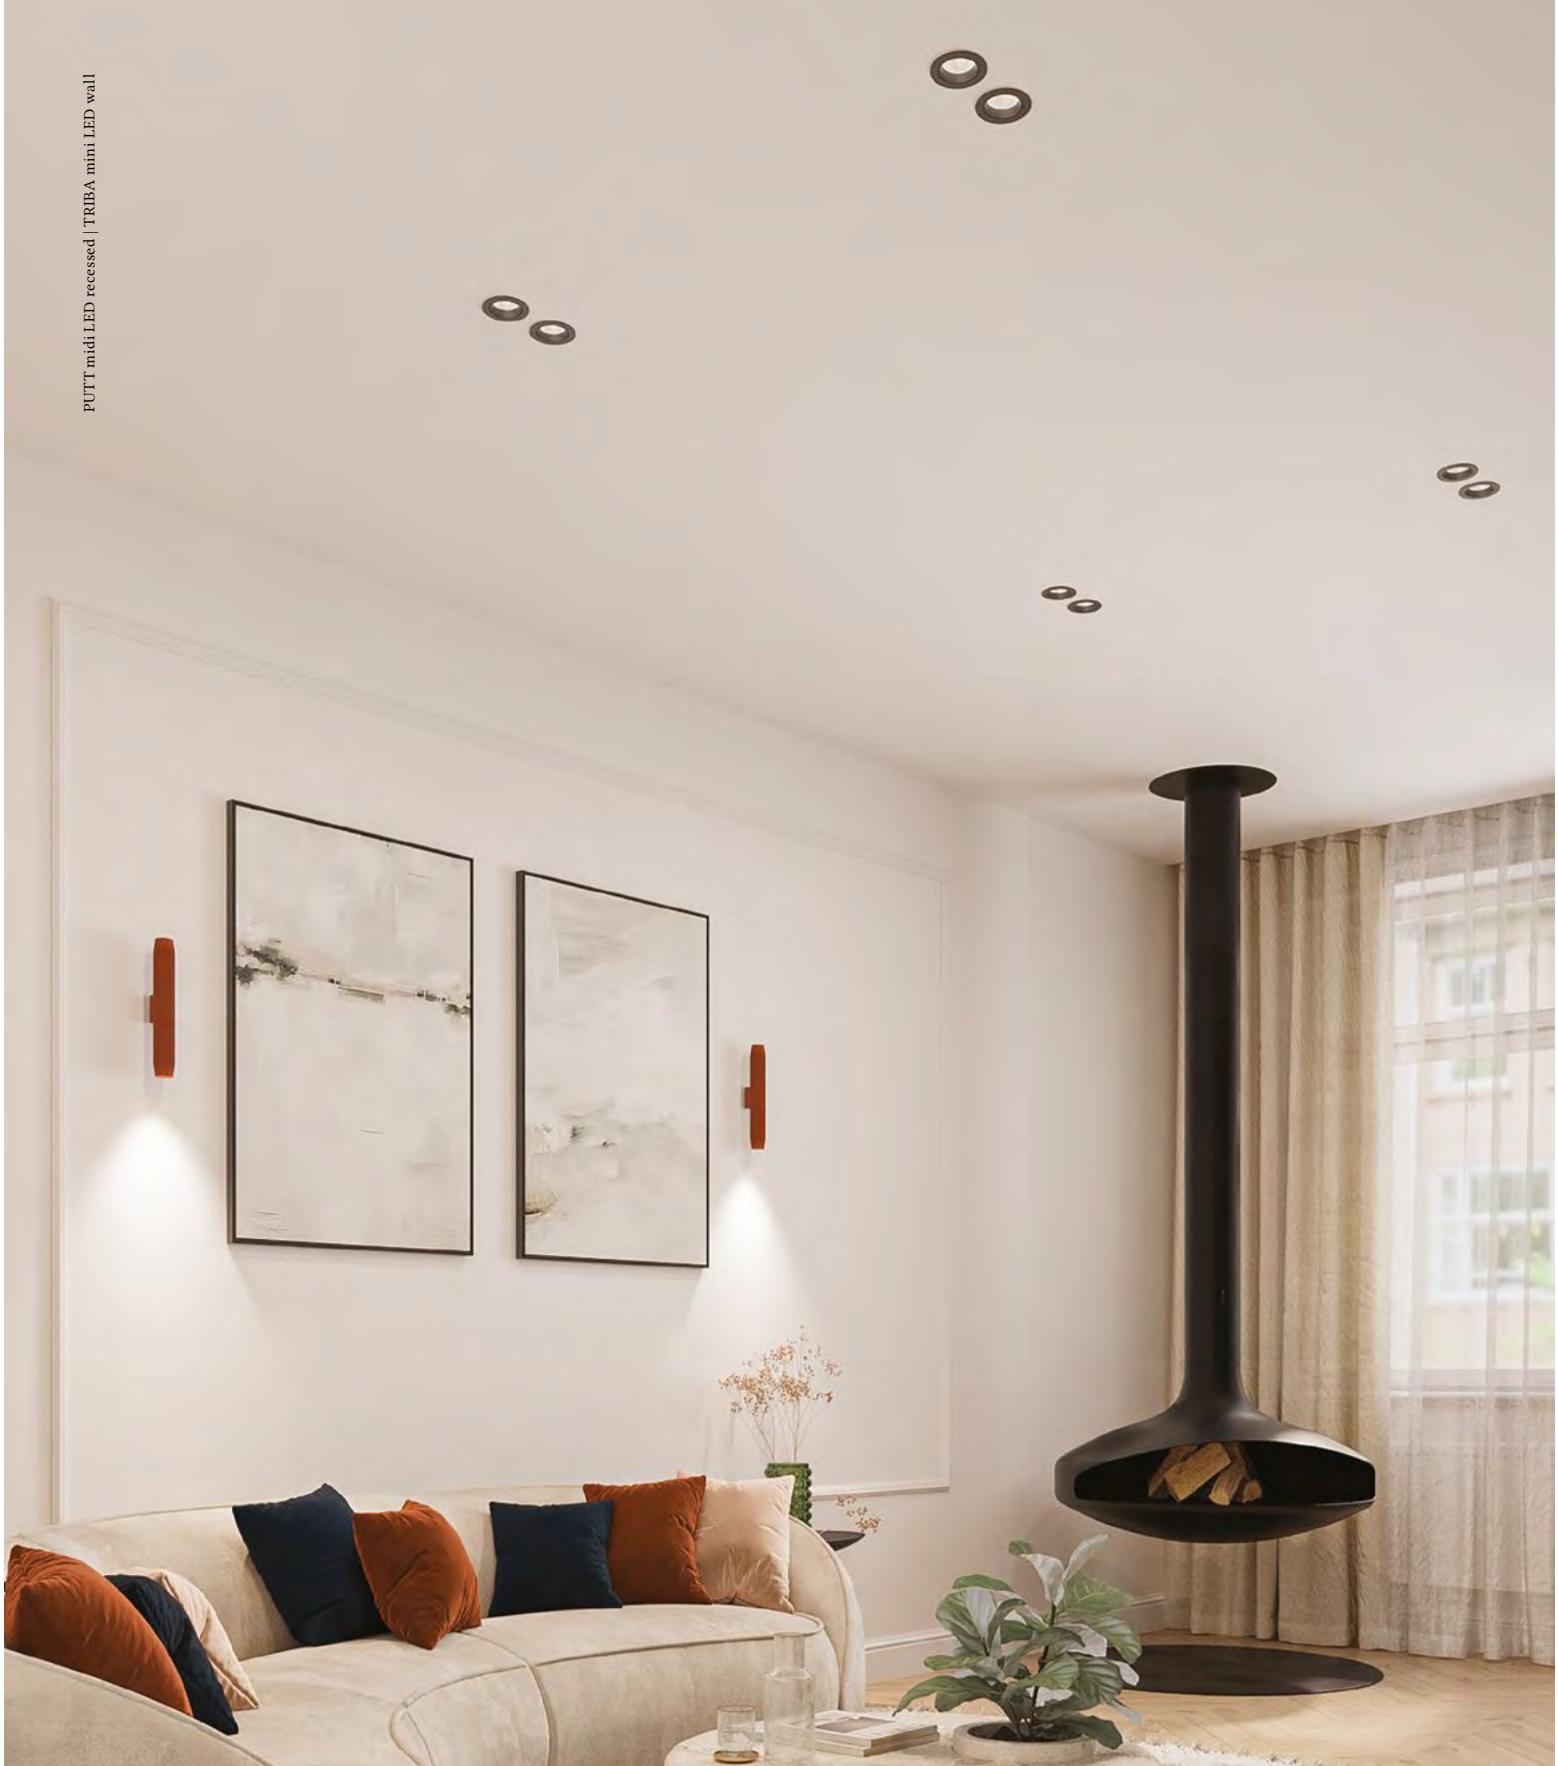

Putt

The PUTT family includes various sizes, power versions and lighting beam angles. Additionally, there are two installation versions: with and without a frame. A wide shielding angle ensures low glare and high visual comfort. Additional accessories are available for PUTT luminaires: honeycomb (additional protection against glare).

The move version allows you to tilt the reflector and use it as accent lighting. Hermetic models with increased ingress protection rate are perfect for bathrooms.

The PUTT family is complemented by a fixture for a traditional light source with a GU10 base.

Lots of possibilities in  
a small, simple form

UDANE

This is the new edition of the HOLLOW luminaire family! The changed design and optics provide even greater visual comfort. Tilting versions will highlight important places in the room, and models with a lens require only 6cm of space for installation. Hermetic variants are perfect for bathrooms, and the GU10 model fits well in places where traditional light sources are needed.

# Swing

**A great way to illuminate  
a space without glare**

High visual comfort is the biggest advantage of this model. The light source hidden deep in the fixture allows you to significantly reduce glare, even in the GU10 version. Excellent light parameters, high luminous flux and the ability to tilt and rotate the reflector are other advantages of the SWING next luminaire. We also offer a version with a trim and an easy-to-install trimless model.

A discreet way to achieve  
effective lighting

NOWOCZESNY WYGLĄD

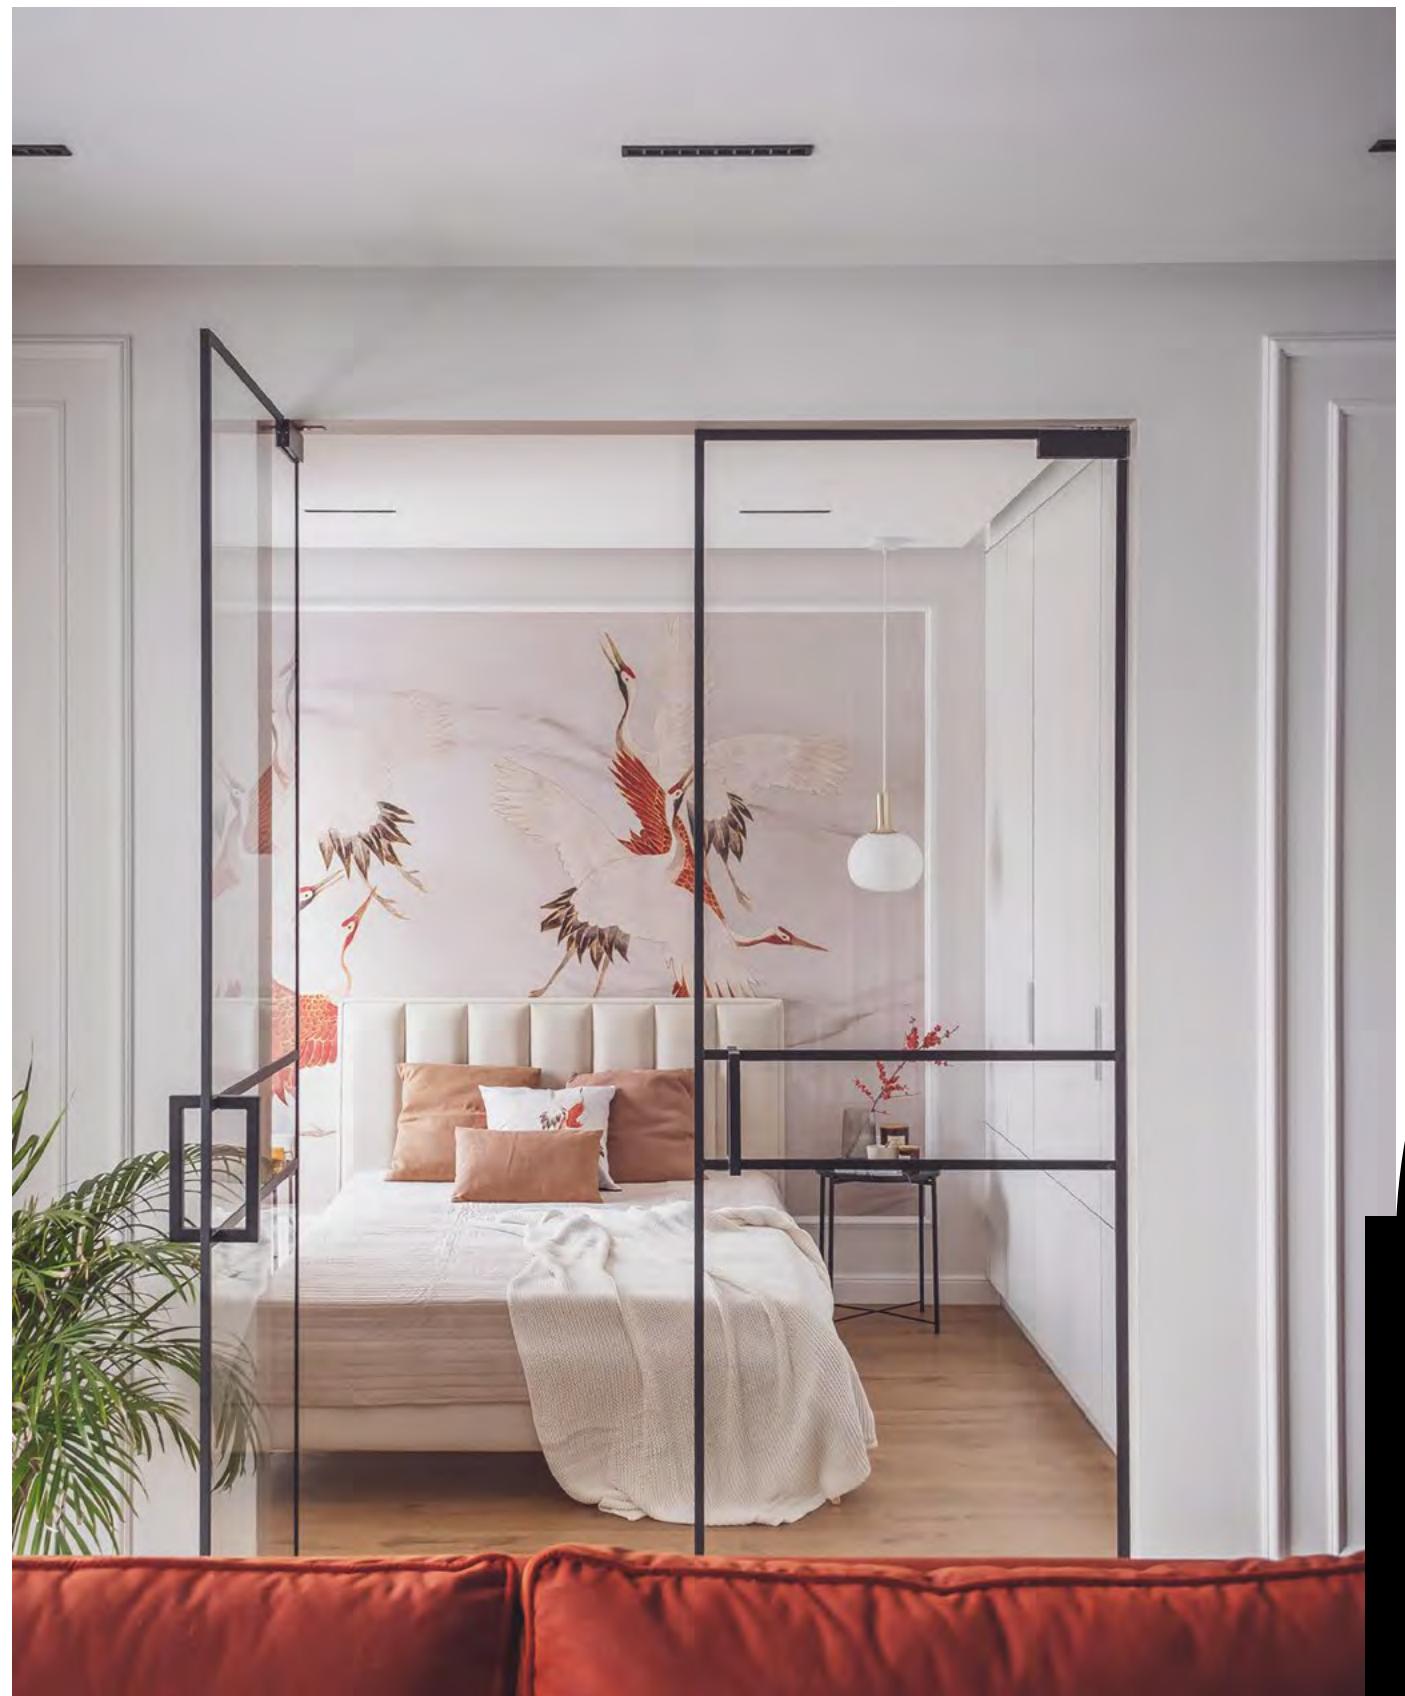

## Rafter

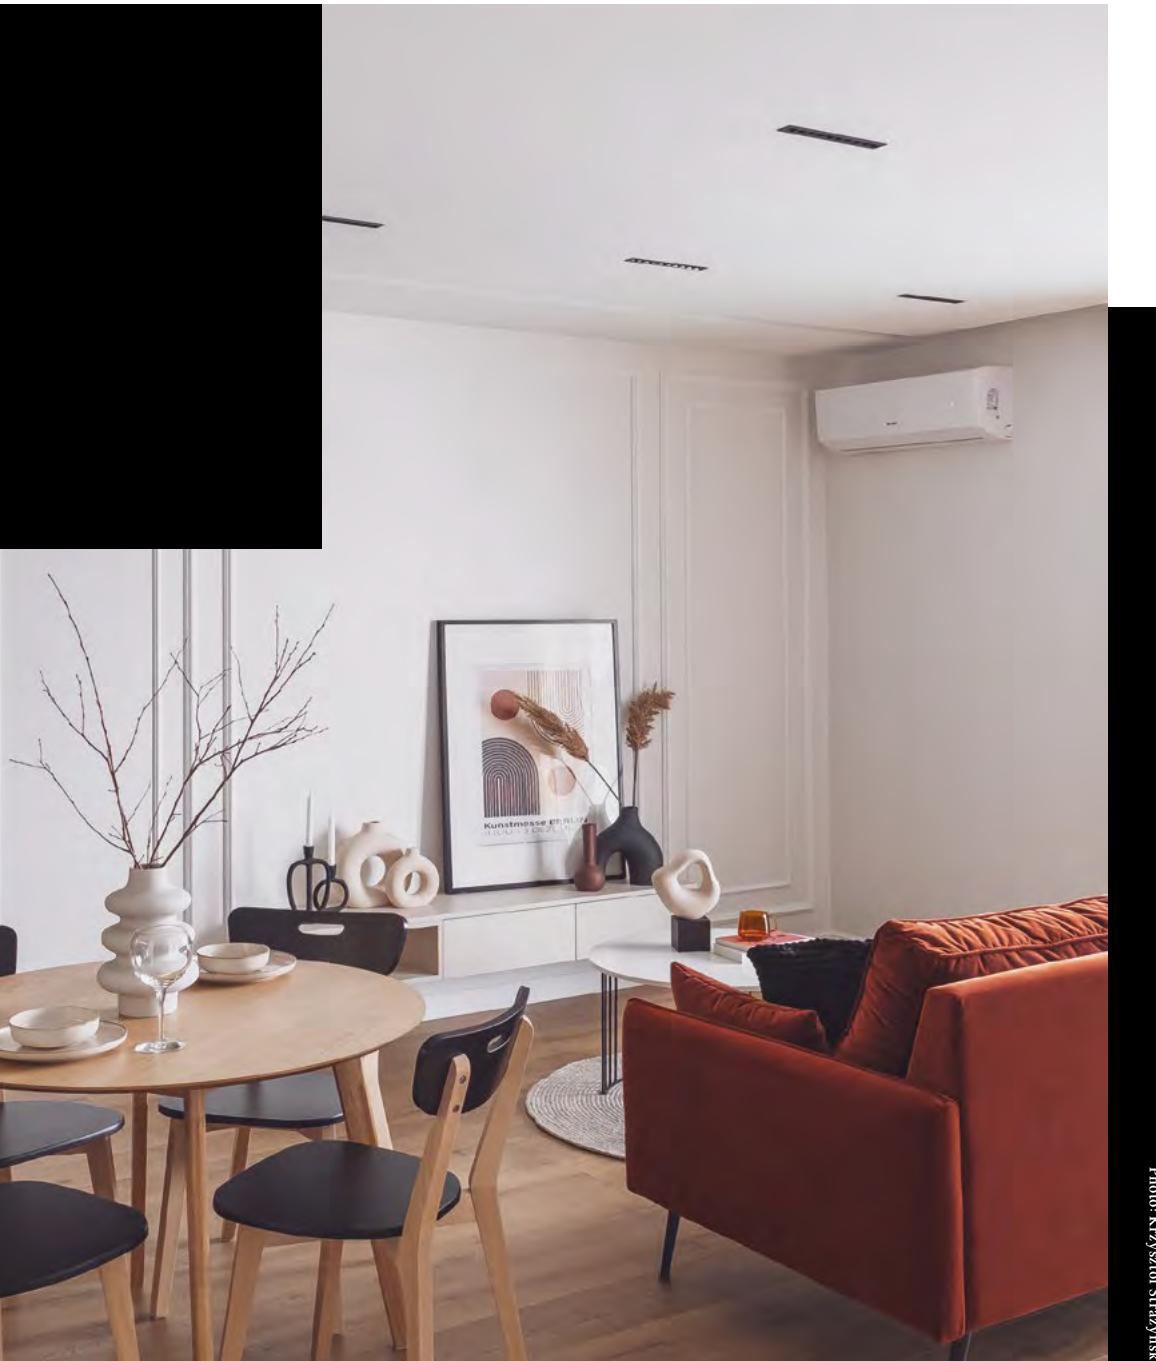

RAFTER family offer many interior lighting possibilities. Precise optics and deeply embedded diodes of RAFTER points models ensure effective lighting and low glare. Opal covers, various lengths and power versions of RAFTER luminaires offer good general lighting. RAFTER wall washer fixtures are used to illuminate walls evenly from ceiling to floor. On the other hand, RAFTER mix combines various lighting methods – point modules and reflectors or an opal cover.

## Two ways for a well-lit interior in one simple form

The MIXLINE fixture combines two lighting methods. The milky cover guarantees diffused general lighting. However, sets of small lenses offer more precise light with two beam angles to choose from. They also provide an interesting visual effect, sharpening the boundary between light and shadow.

## Excellent parameters concealed in decorative design

The TRIBA collection proves that decorative design can harmonize with exceptional technical specifications. Due to its hybrid optics and expanded shielding angle, the fixture prioritizes visual comfort while boasting extraordinary efficiency without compromising light quality. Therefore, TRIBA adeptly handle both private and public spaces. Its broad power range, two diameters and various lengths available allow the fixture to flexibly adapt to the specific needs of different interiors.

Subtle interior decoration

HARMONIA

I ŚWIĘTNE Pet

The PET LED collection was designed to combine performance with elegance. It has excellent technical parameters both in terms of efficiency and visual comfort. With variety of optics and available powers can suit both residential and professional users. The ability to change the colour of the frame and the ring is an invitation to play with the finish.

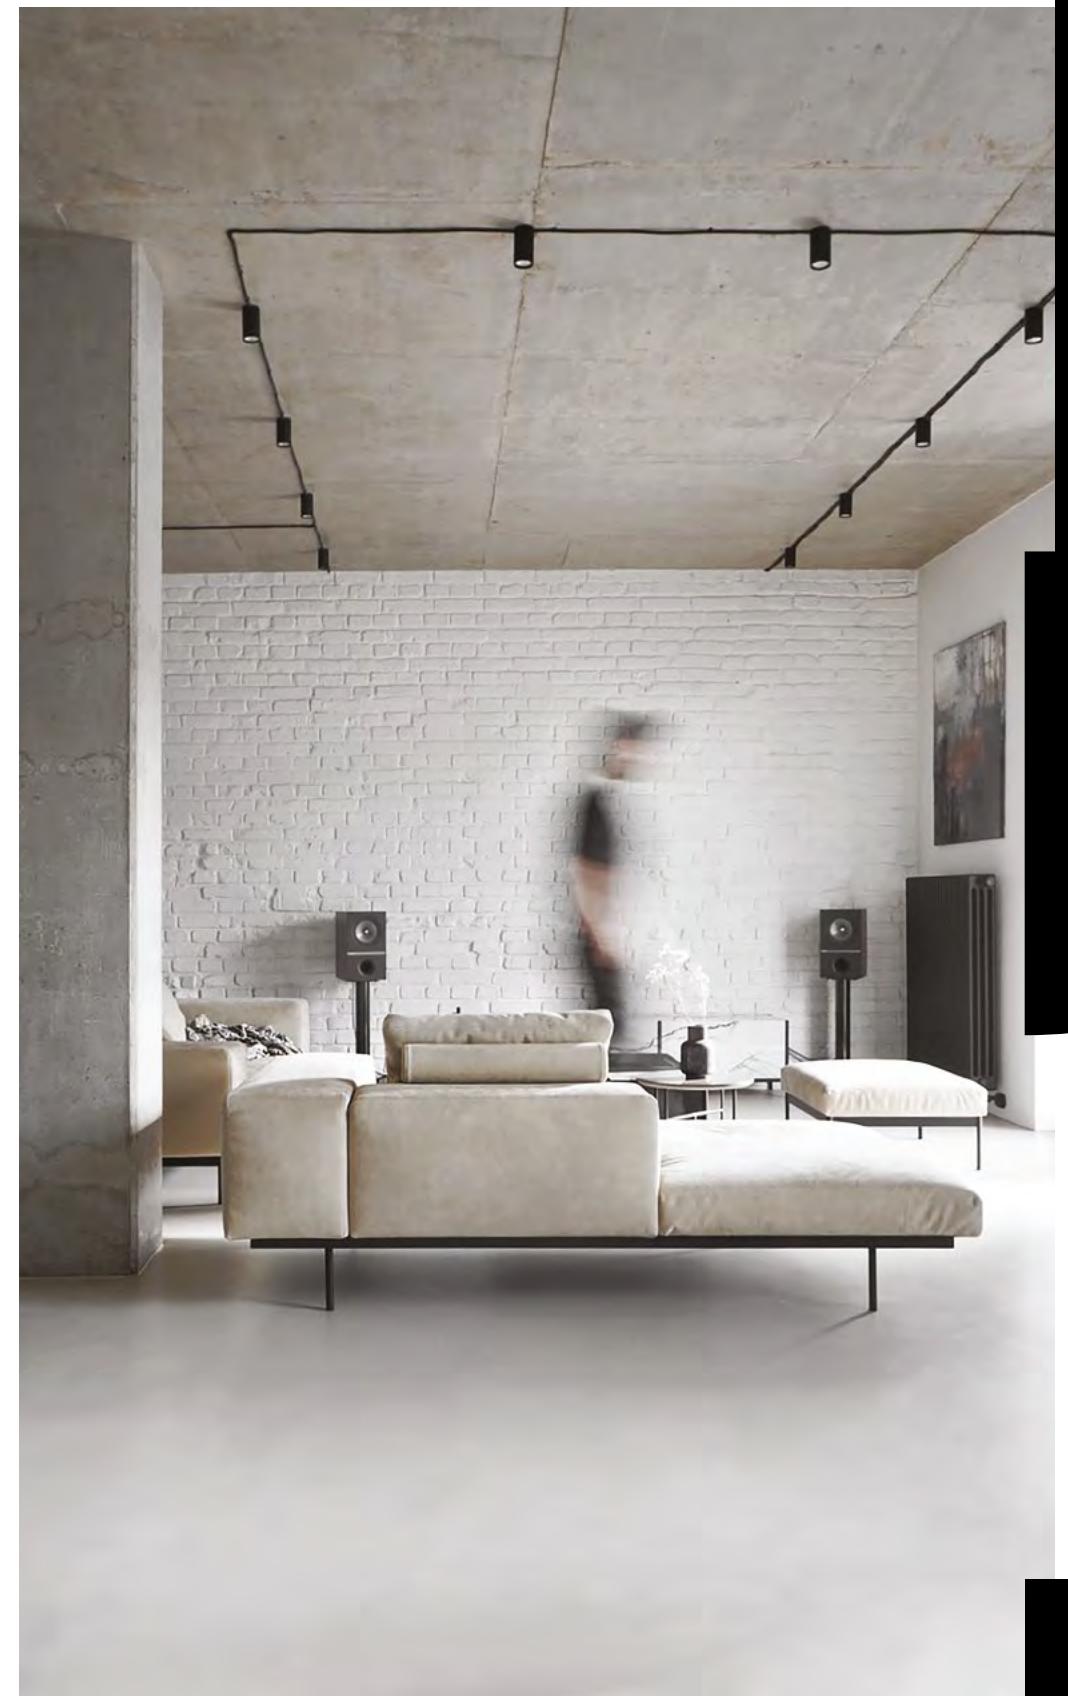

Some interiors require a special atmosphere. An atmospheric restaurant, a cozy cafe or a home living room are spaces where light plays a special role – soothing the senses, promoting a sense of relaxation and tranquility. The PET collection for interchangeable E27 light sources will perfectly cope with this task. It comes with accessory E27 LED lamps designed to replace carbon filament Edison's bulbs in terms of extremely warm light (1800K) and low power.

Simplicity in a modern form

Z O D R O B I N A

MLECZNA KULA

Modern Ball  
simple

MODERN BALL simple joins timeless form a modern lighting. Minimalistic design and three-layer opal glass conceal a contemporary integrated light source, together forming an exceptionally harmonious trio. With excellent technical parameters, despite its decorative nature, MODERN BALL emits as much as 100lm/W at CRI>90, a result typical of strictly technical luminaires. The version with increased IP54 ingress protection class will successfully find use in bathrooms, for example, as efficient mirror lighting or as general lighting.

# Modern Ball

Unique design and  
timeless curves

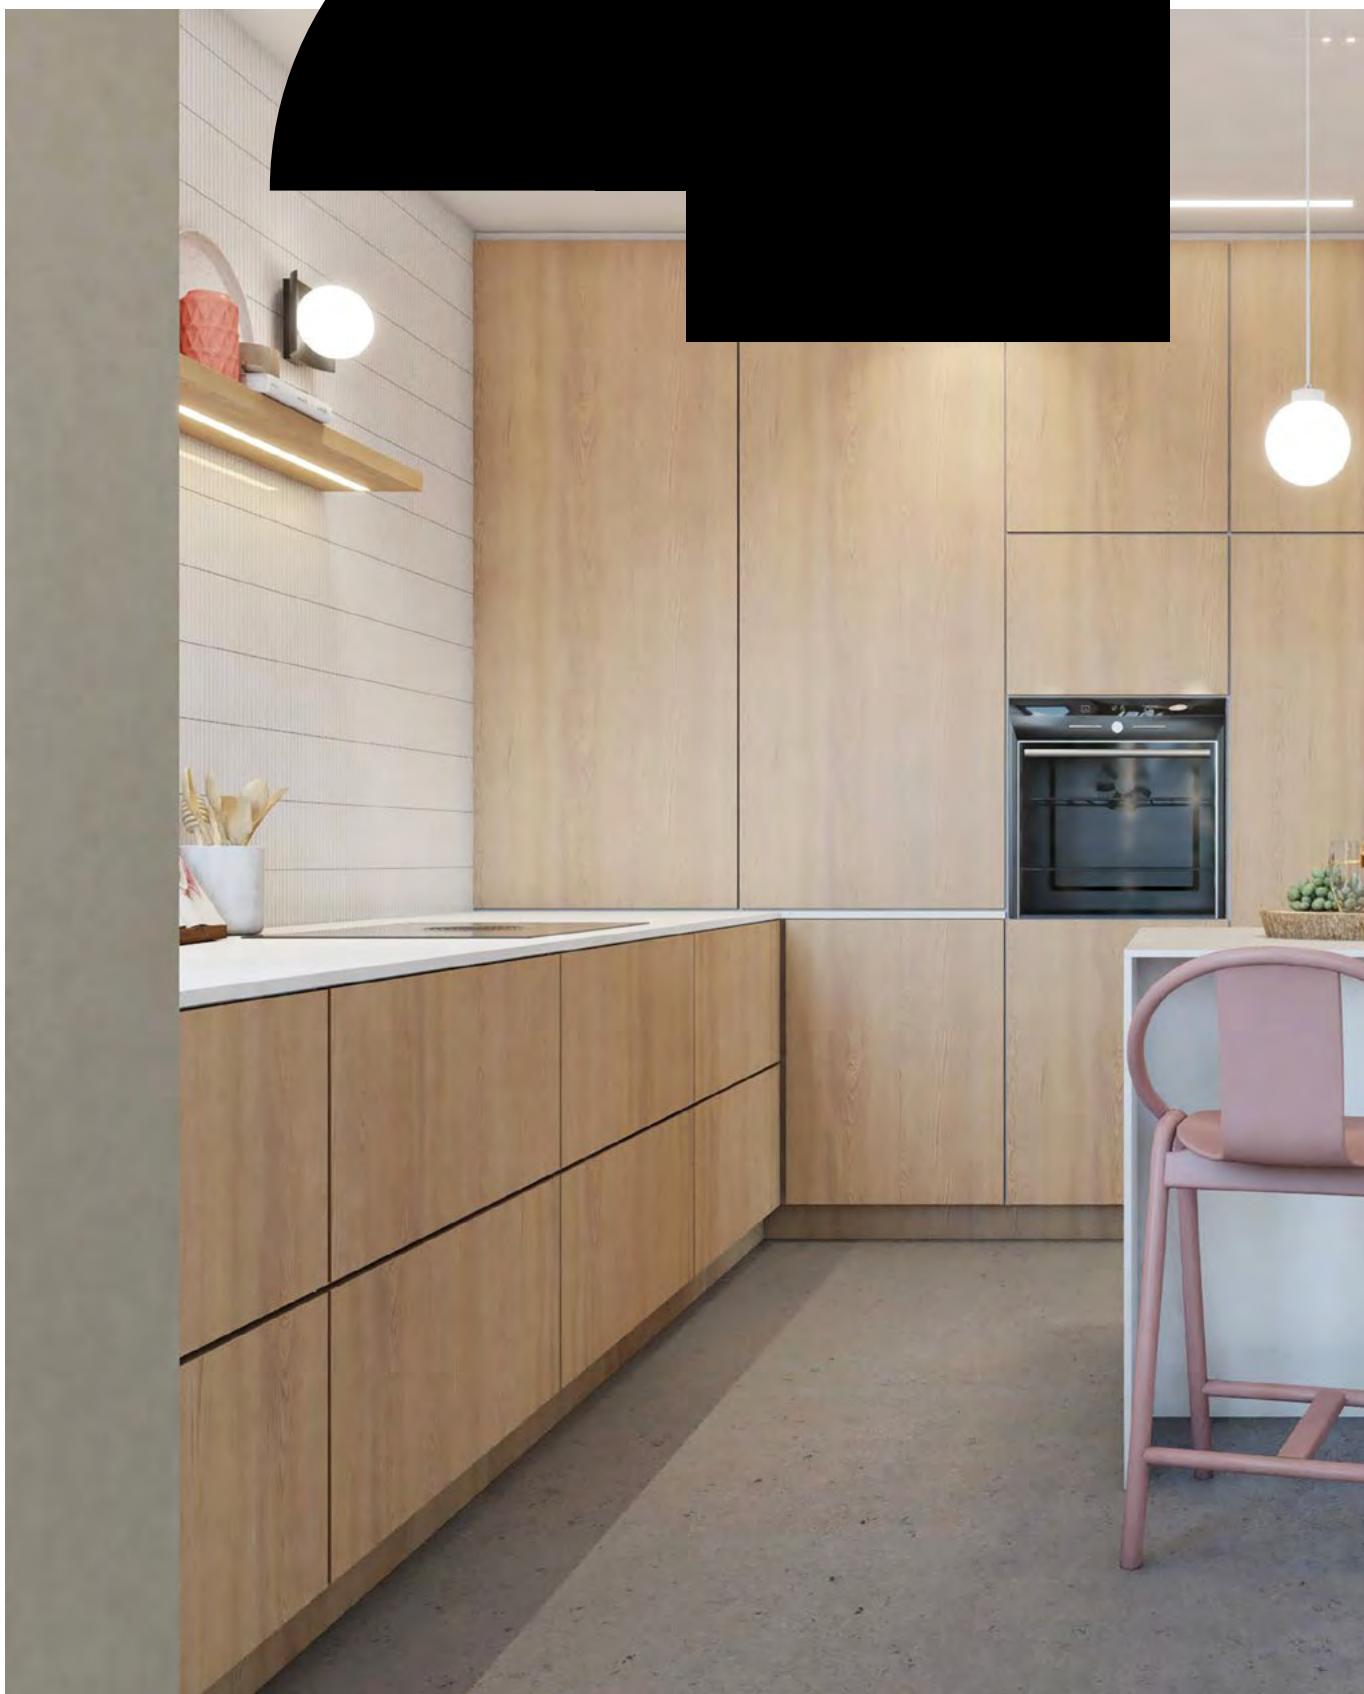

MODERN BALL collection created in cooperation with the Czech design studio DECHEM, provides comfortable, efficient light of the highest quality. In addition, MODERN BALL – depending on how it is installed – can serve as a multitask specialist. On the ceiling, it will prove useful as general lighting for a living room or a passageway, while the suspended version is a good option for lighting a table or reception area. In the wall-mounted variant, it will provide a cosy ambience as stylish supplementary lighting.

## Comfortable lighting in a contemporary style

The MIDI/MAXI RING dot collection provides two key features within a single product. It emits softly diffused reflected light while impressing with its remarkable form. The eye-catching, centrally embedded, dot element plays a dual role: on the one hand, it adds aesthetic piquancy, on the other – it hides the light source from the user's view for the highest visual comfort. In the version with a white interior, RING dot will provide comfortable general lighting. Moreover, variants with a coloured interior are perceived as a kind of jewelry of the interior, often used as a wall fixture.

wydaJność

## Exceptional durability or decorative character

The BLOS fixture family presents a versatile collection suited for various purposes. BLOS round distance, with its high IP54 waterproof rating and IK10 mechanical resistance, excels as general lighting even in challenging conditions such as underground passages. On the other hand, BLOS cast C LED, with a more decorative nature, delicately illuminates spaces, bringing out their best features.

## Big dimensions with even bigger possibilities

To illuminate a large space, such as an office, hotel lobby or spacious living room, you need luminaires with special capabilities. The microprismatic cover will provide visual comfort, making it possible to achieve UGR<19. This is especially important in open space interiors, where productivity and comfort of employees matter. In the standard version (power A), the luminaire allows power adjustment, while the Tunable-White variant allows you to adjust the colour temperature.

# Rafter

## Multifunctional series with a wide range of possibilities

Depending on the selected variant, opal diffuser version, the luminaire provides effective general lighting, while in the points version – effective task lighting. The deeply recessed LEDs are shielded excellent, allowing very high intensity task lighting with no glare at all. The multitasking Rafter mix version, combines several functions within a single product. How is this possible? The points modules act as a task lighting, while the slender PET spotlights direct the light to the chosen detail – a favorite painting or original decorations on the walls.

If the interior design requires it, non-standard installation methods are also possible

Multifunctionality hidden  
in a slim, linear form

DOSKONALE

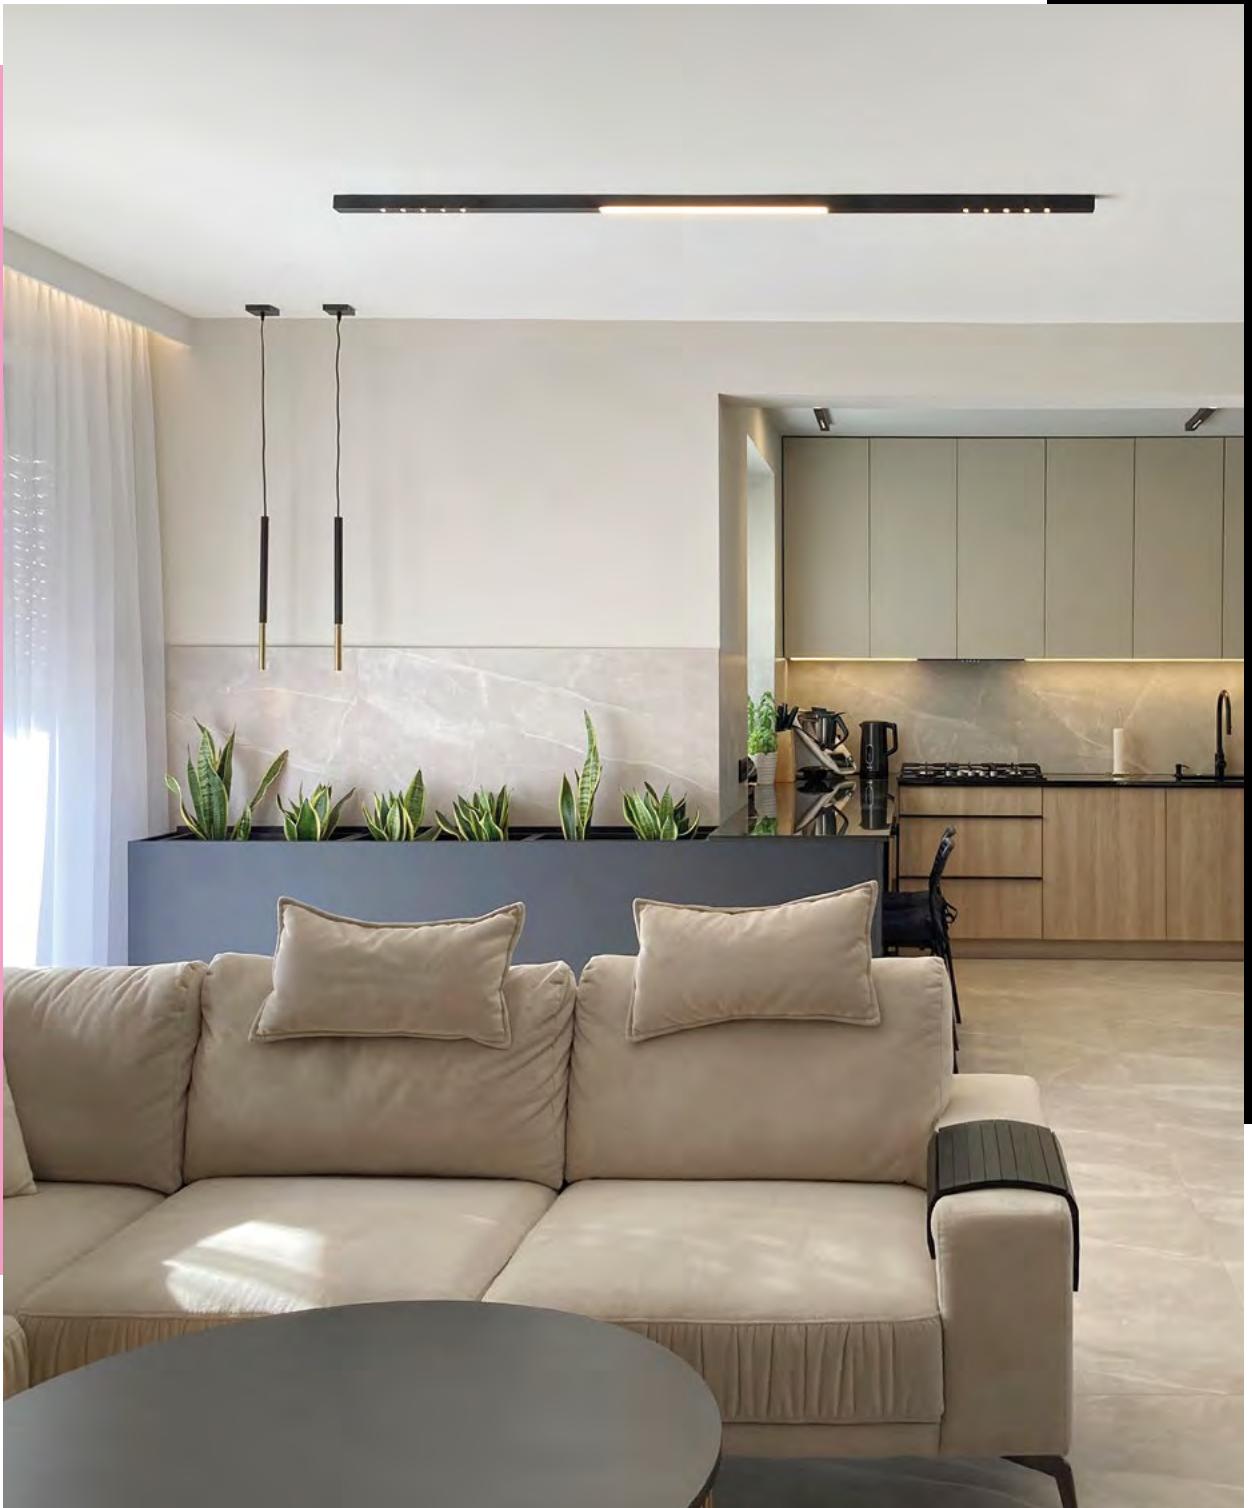

Mixline

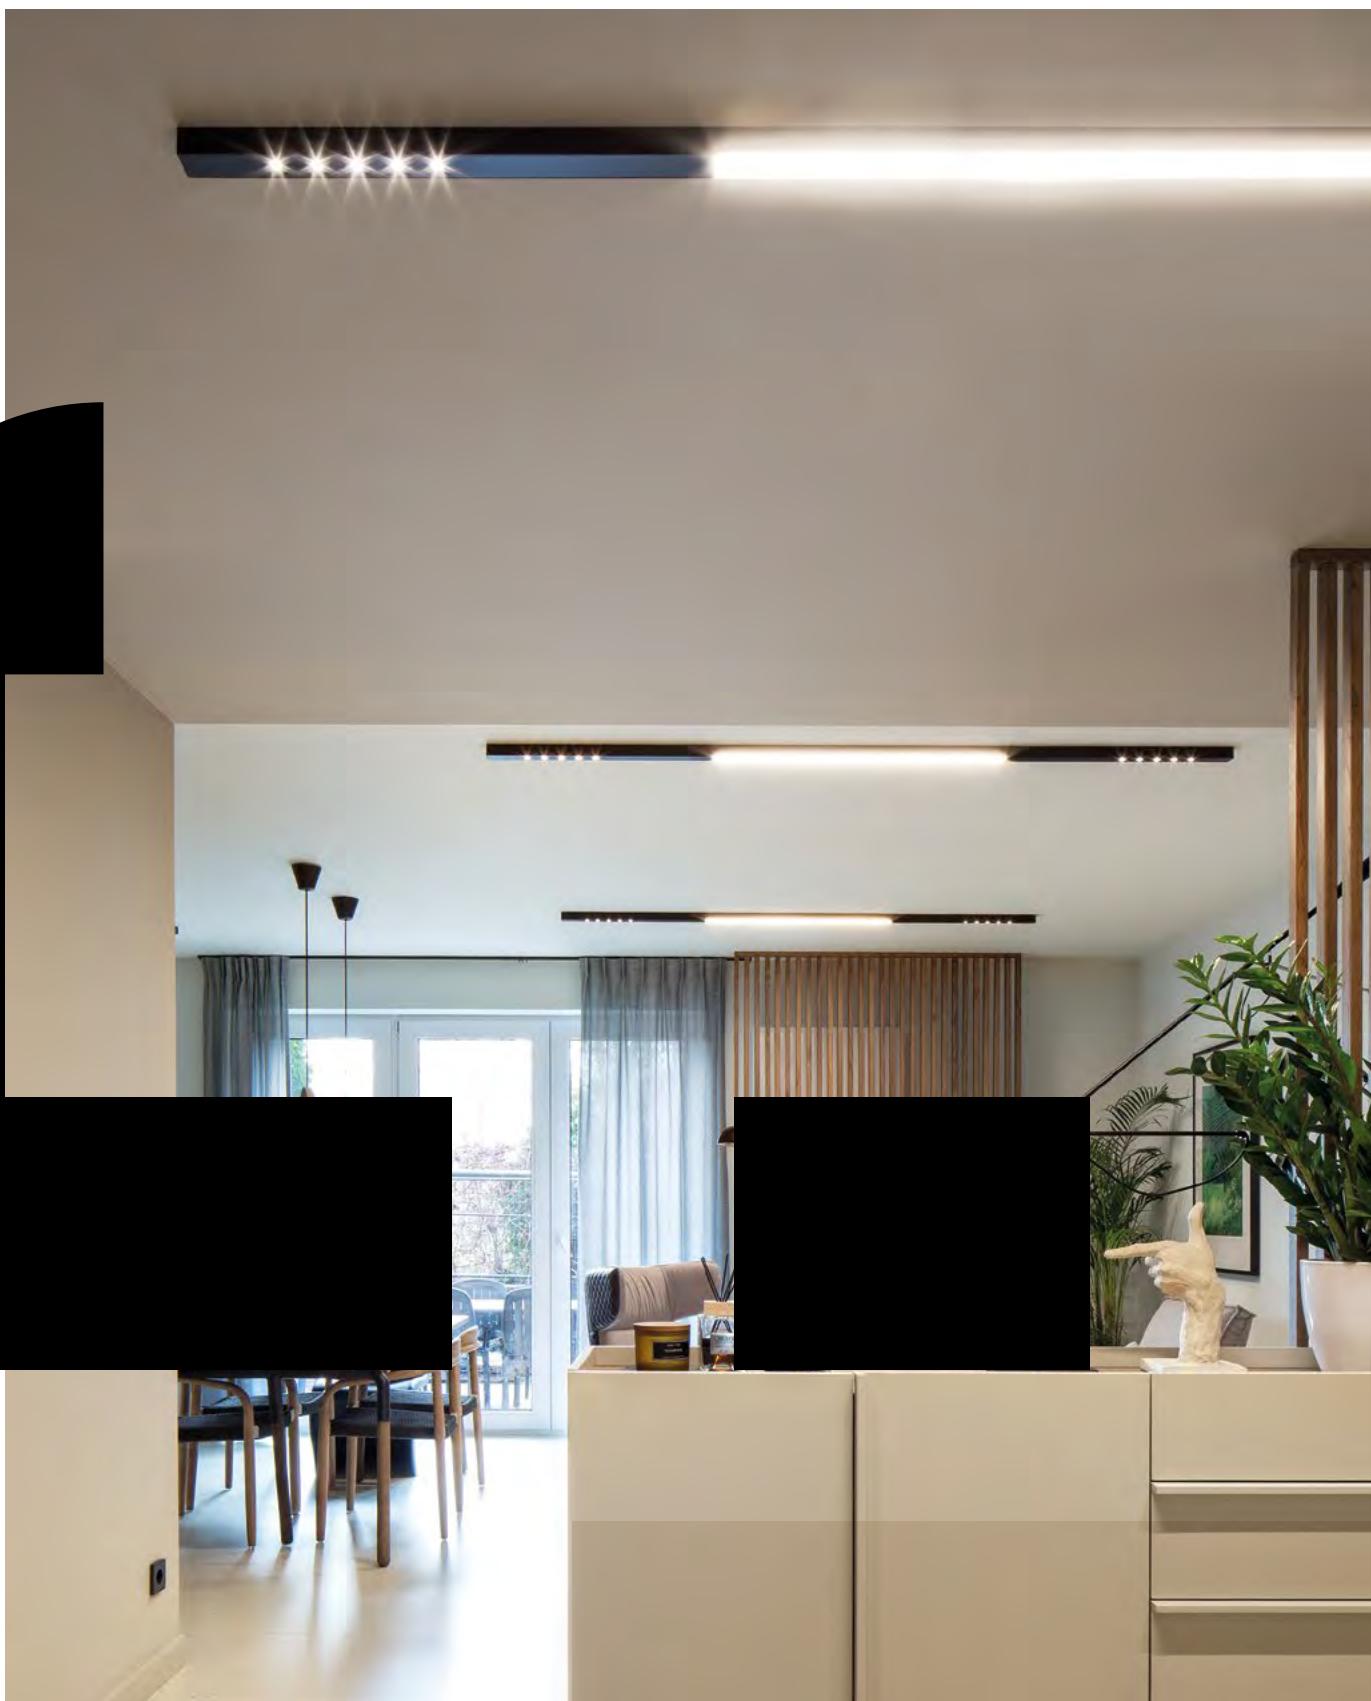

ROZWIAZANIE

The MIXLINE collection is the perfect choice, especially when one product is to perform several functions . The luminaire combines two types of optics: diffused and point light, making it suitable for general and task lighting. The part with a cover emits softly diffused light, providing general illumination of the room, while the point light guarantees appropriate intensity on the working surface of the countertop or table. MIXLINE is also a great solution for lighting passageways in homes, offices and hotels.

## Comfortable lighting designed for offices

Lighting is a particularly important element in office spaces. Properly selected, it positively affects the concentration and efficiency of employees. SET TRU will perfectly cope with this task – a luminaire designed for offices, providing effective lighting of the desk and the surrounding space. The PRO variant protects against glare, and the up&down version, allows for even illumination of all important surfaces. In addition, SET TRU is distinguished by high energy efficiency and elegant, minimalist design, perfectly matching the character of modern offices.

## Enhance table ambiance with reliable lighting

In some places, the ambiance matters most. A cozy restaurant or café requires appropriate lighting. Decorative IKI fixtures, created in collaboration with Andrzej Klisz, a professor at the Academy of Fine Arts in Katowice, come to the rescue in such interiors. In the LED version, the fixture emits precise task lighting, illuminating work surfaces like counters or receptions, while the IKI round E27 works wonderfully as mood lighting for tables.

Play of colours  
and finishes

Wood, synthetic material or perhaps felt?  
The OKKA collection surprises with its  
possibilities, inviting playfulness with colour  
and finish. Modern design and a decorative  
character serve as intriguing accents  
in any arrangement. Therefore, OKKA  
can become its distinctive feature, adding  
a unique brilliance to the interior.

# Flying Ball

FLYING BALL is a fixture that merges unique aesthetics with excellent technical parameters. Its covers, crafted from three-layered frosted glass, ensure comfortable lighting and shield the eyes from unpleasant glare. Meanwhile, efficient light sources guarantee ample illumination on tabletops, ceilings and walls throughout the entire room. Moreover, a single fixture can effectively light up spaces spanning even several square meters.

## Enhance interior acoustic comfort

AQfelt adds to acoustic comfort. The sound-absorbing felt used has acoustic parameters optimized for absorbing sounds over the range of frequencies that are essential for verbal communication. Due to this, it significantly contributes, among other things, to improving speech intelligibility and reducing the reverberation time. Better acoustics mean more comfortable indoor conditions!

Efficient task lighting

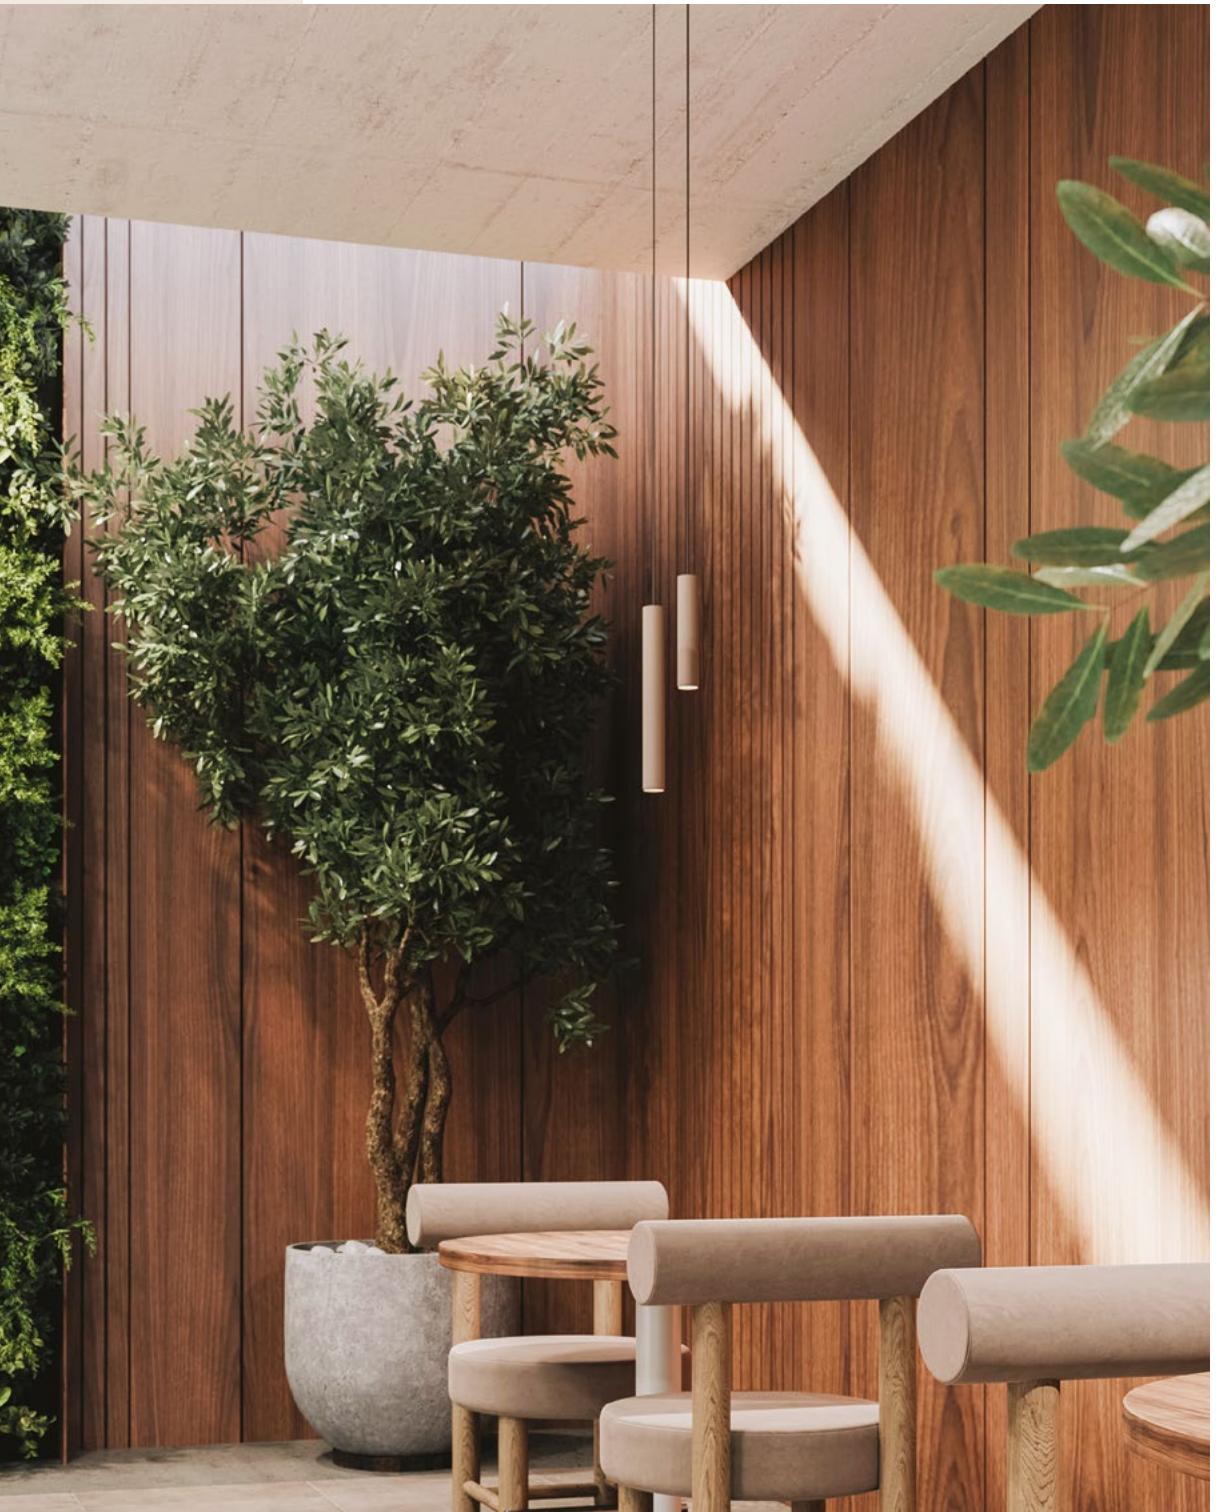

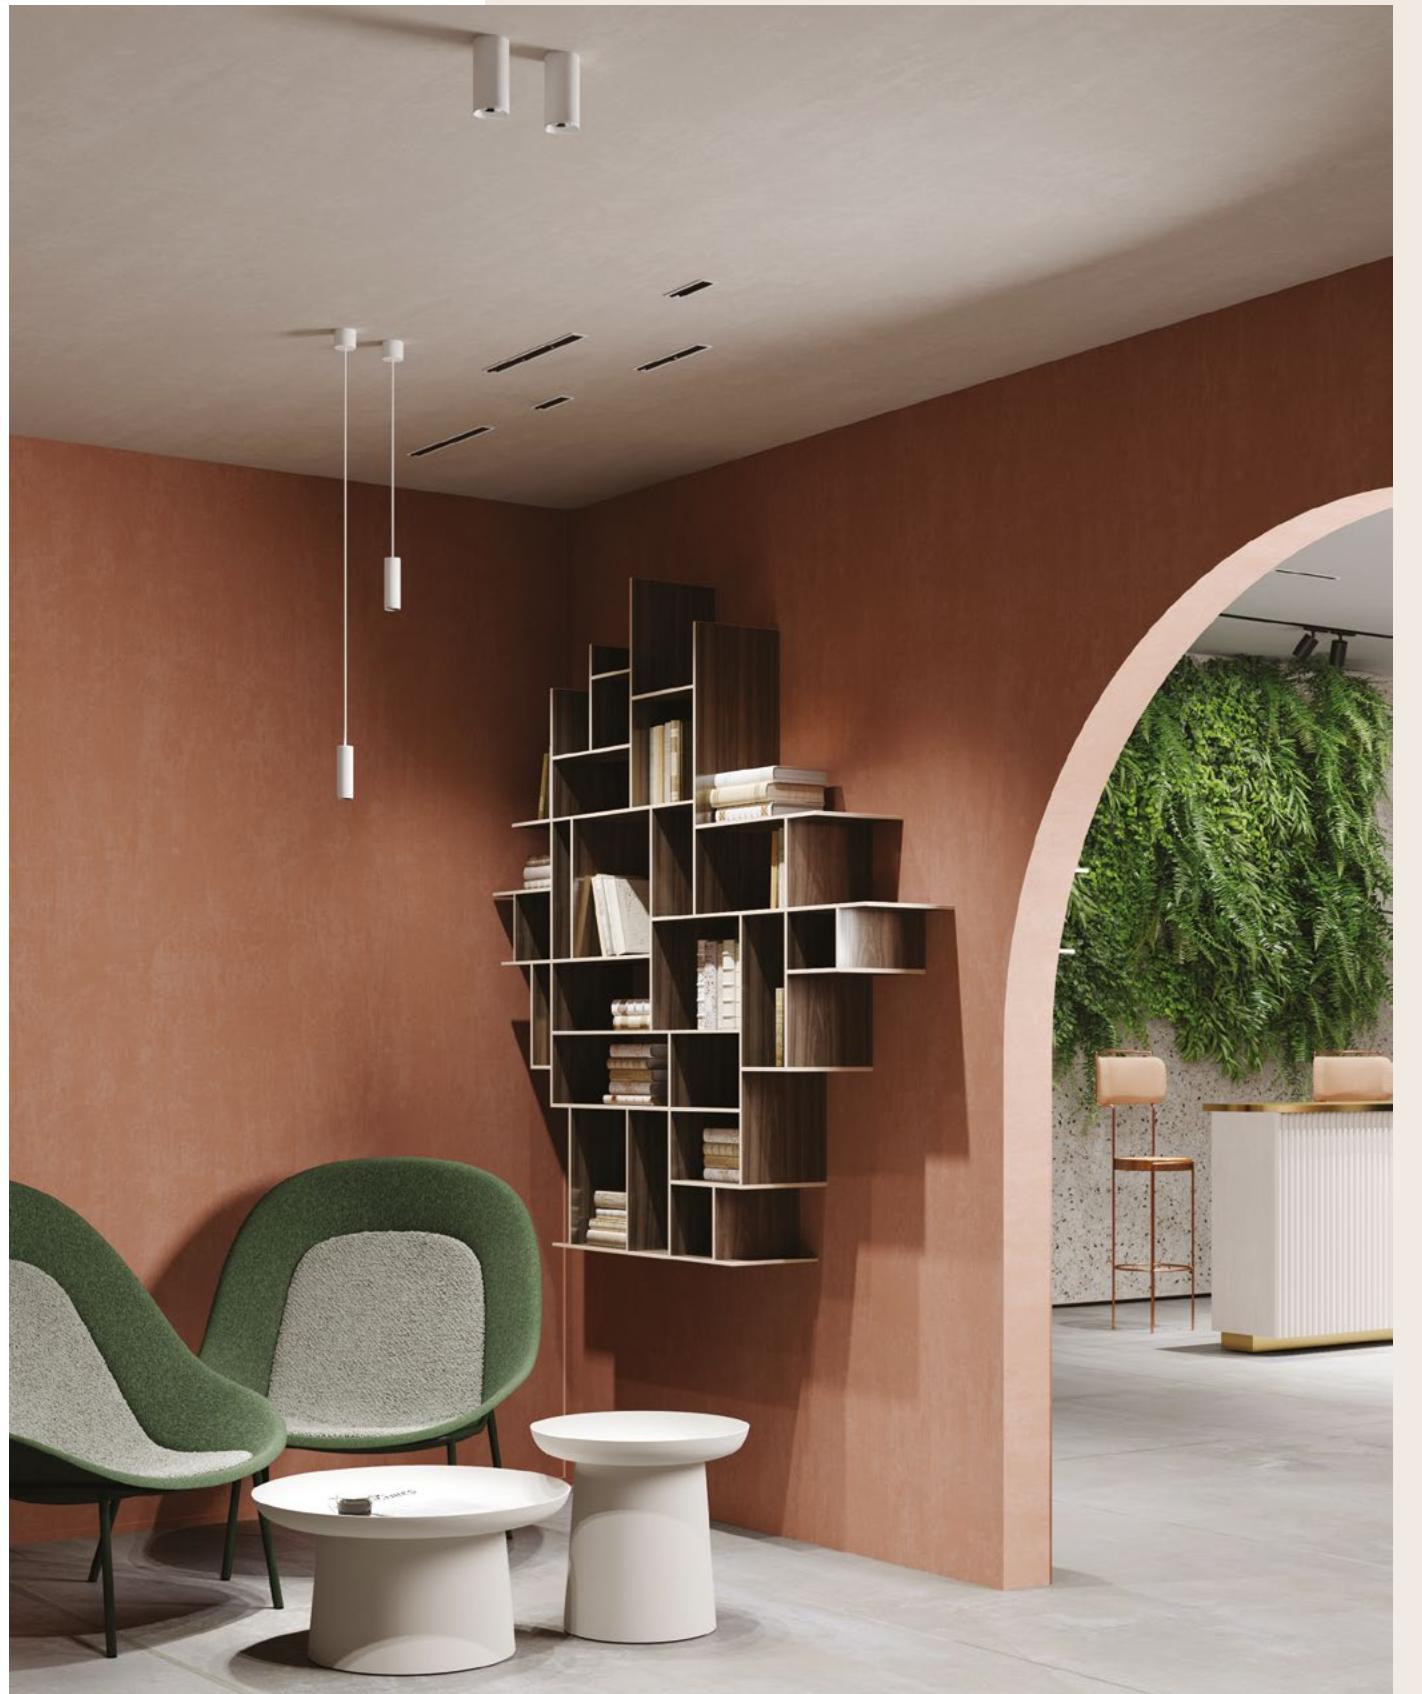

PET is a versatile range of fixtures renowned for its high efficiency and excellent technical parameters. In its suspended version, it excels as effective task lighting for work surfaces – such as tables, counters or receptions. Its slender, minimalist form serves as a discreet accent in modern interiors, while the deeply set light source safeguards the user's eyes from glare. This makes PET a functional lighting solution suitable for both private and commercial spaces.

## A proven way to illuminate tables stylishly

The MIDI / MAXI RING collection combines two key functions within one fixture. On one hand, it provides pleasant, softly diffused ambient light; on the other, it captivates attention with a striking, centrally placed dot element. This particular feature adds a distinctive look to the collection while discreetly concealing the light source from the observer's view. Thus, the fixture ensures the highest visual comfort, performing exceptionally well as table lighting or comfortable general lighting.

### A fixture defying the laws of physics

equilibra BALANS emerged from collaboration with the Polish designer Piotr Jagiełłowicz. The fixture surprises with a form that seemingly defies the laws of physics at first glance. Its original suspension method embodies balance and lightness, while its distinctive curves seamlessly blend with current design trends. Consequently, equilibra BALANS stands as an excellent choice for modern lighting in the most prestigious spaces. It adeptly manages to evenly illuminate a household table or a reception area.

Fixture tailored to the rhythm of office spaces

The secret behind OPTIMA lies in its way of illumination. Task lighting emitted downwards effectively brightens the work surface, while the up&down version directs a strong, wide-scattered beam also directed. As a result, the light bounces off the ceiling, serving as general lighting. Ensuring suitable conditions, OPTIMA adeptly manages to independently illuminate the entire office. Moreover, if the layout involves two desks facing each other, one OPTIMA fixture of appropriate length efficiently illuminates both surfaces along with their surroundings.

# Optima

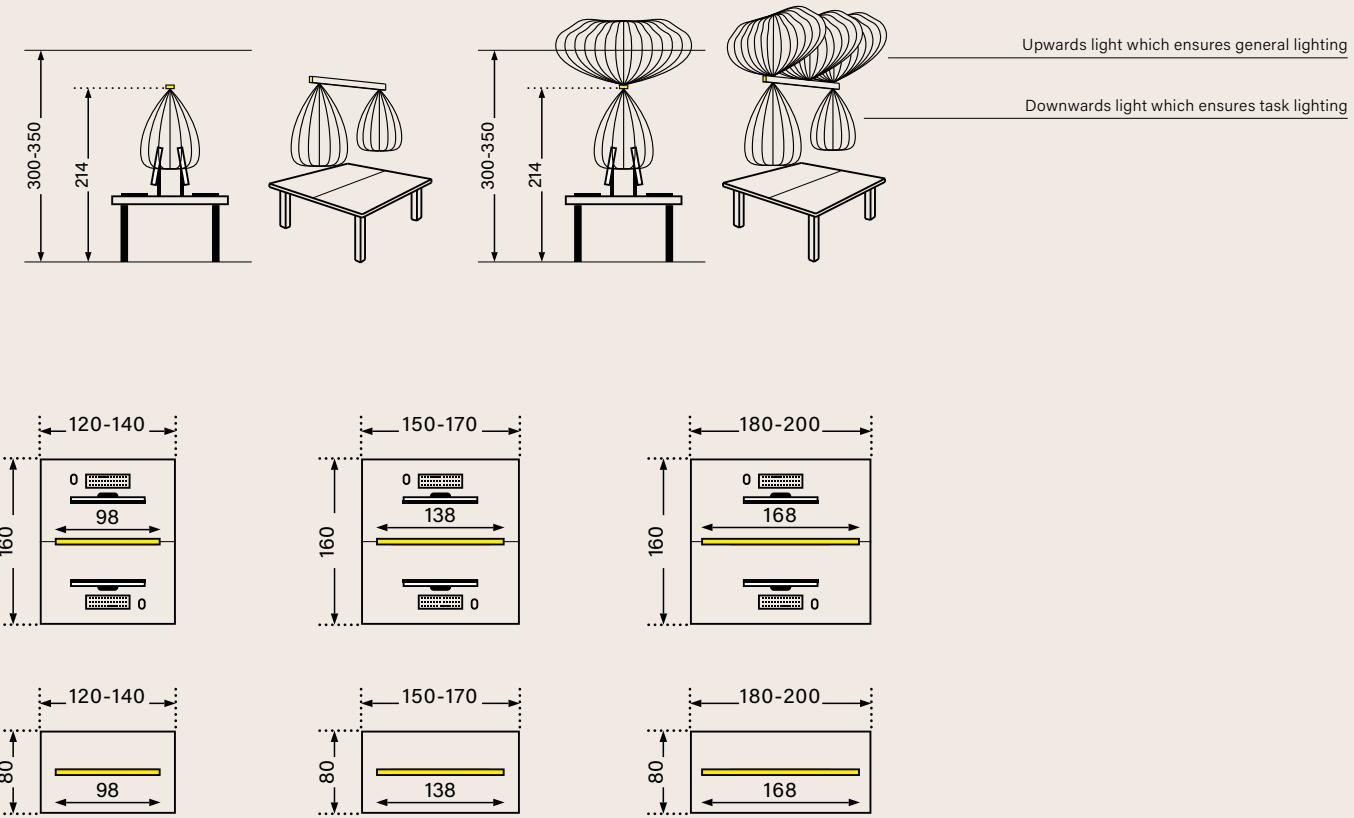

# Optima

SUSPENDED

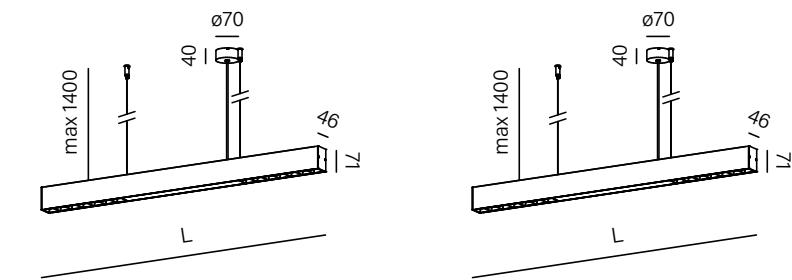

What is most important when lighting office spaces? Efficiency and economy. Therefore, these two factors have been perfectly balanced in the luminaires of the OPTIMA series. The task light is emitted downwards, allowing to illuminate the desk top. In the up&down version, strong light with a very wide distribution is directed upwards, ensuring good illumination of the environment by means of the light reflected from the ceiling. Effective use of OPTIMA luminaires basically does not require a lighting design – a white ceiling, a 220cm installation height and selecting a length similar to the size of the desk is enough to avoid the need to use any additional lamps in the room.

And if you have a set for two connected desks opposite each other, we have good news: one OPTIMA luminaire of the right length can handle such a challenge. Efficiently and economically.

## Efficient office lighting

The BIG SIZE family boasts excellent technical parameters, adjustable power and light output and a high colour rendering index. In its PRO version with a microprismatic diffuser it excels as office lighting, ensuring optimal visual comfort while maintaining high illumination levels on desks. Available in multiple sizes, BIG SIZE also flexibly adapts to the needs of domestic spaces or hotels.

## Tracks – a way to achieve well-adapted lighting

Lighting tracks are very flexible solutions. Their main advantages are powering many luminaires from one point and the ability to easily change the arrangement and number of luminaires. They are perfect for shops, galleries and restaurants, but also for residential interiors.

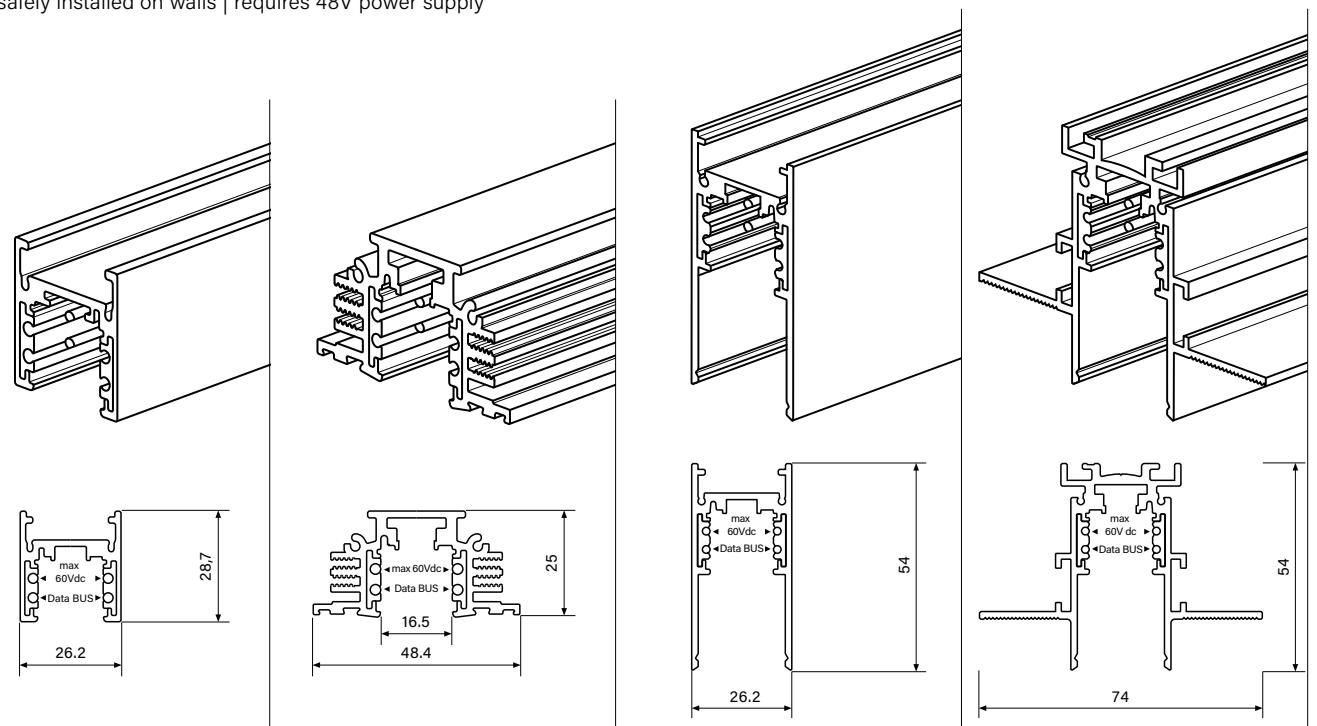

MULTITRACK models are distinguished by their simple form and safe voltage of 48V inside the track. They can be mounted not only on the ceiling, but also on the wall, within easy reach.

MULTITRACK ST6 is a surface-mounted version with a shorter track height. It can also be used as a suspended solution. ST3 is a recessed variant. In both cases, the frame adapters are flush with the edge of the track. Higher versions – surface-mounted ST2 and recessed ST5 – are solutions in which the linear fixtures are completely hidden in the track.

3F tracks are very popular systems. They are available in a surface-mounted version (which, when supplemented with cable slings, will serve as a suspended version), as well as a recessed version, available to order. 3F tracks are also available in the DALI version.

### MULTITRACK surface | recessed | high surface | high recessed

48V | max 3 metres in one piece | ON-OFF (one or two circuits) | DALI  
Can be safely installed on walls | requires 48V power supply

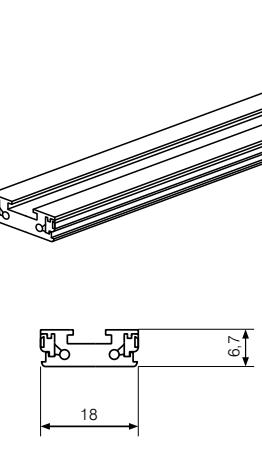

### FLATTRACK surface

48V | max 3 metres in one piece | ON-OFF  
Extremely thin | can be safely installed on walls  
Requires 48V power supply | DALI version coming soon

# Multitrack & High Multitrack

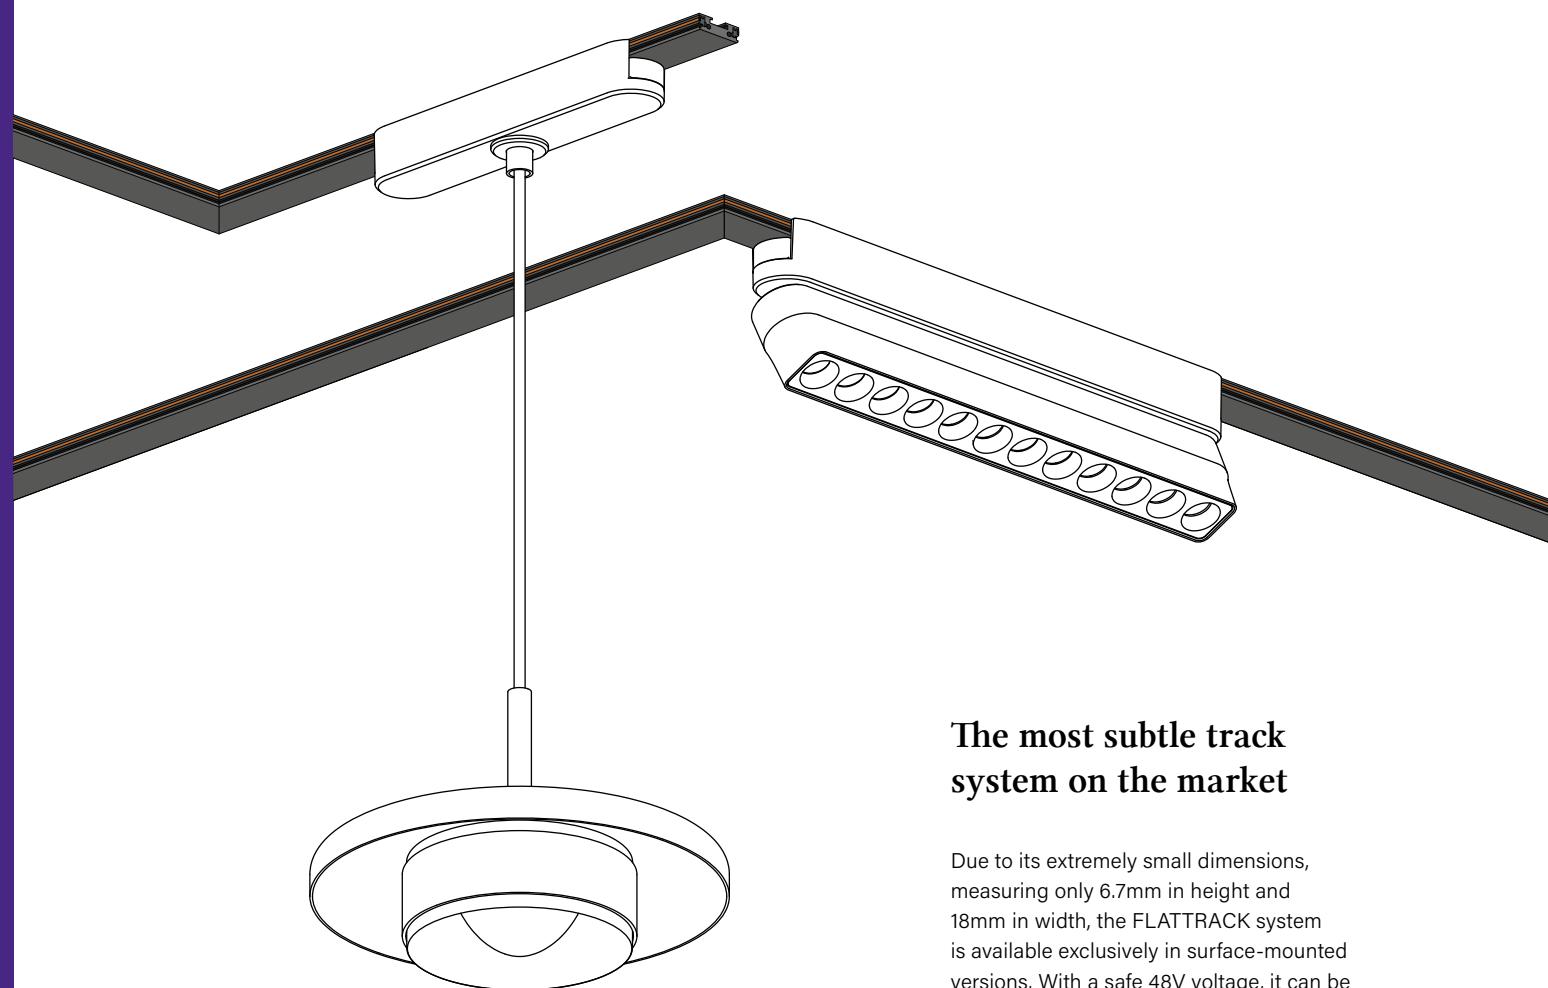

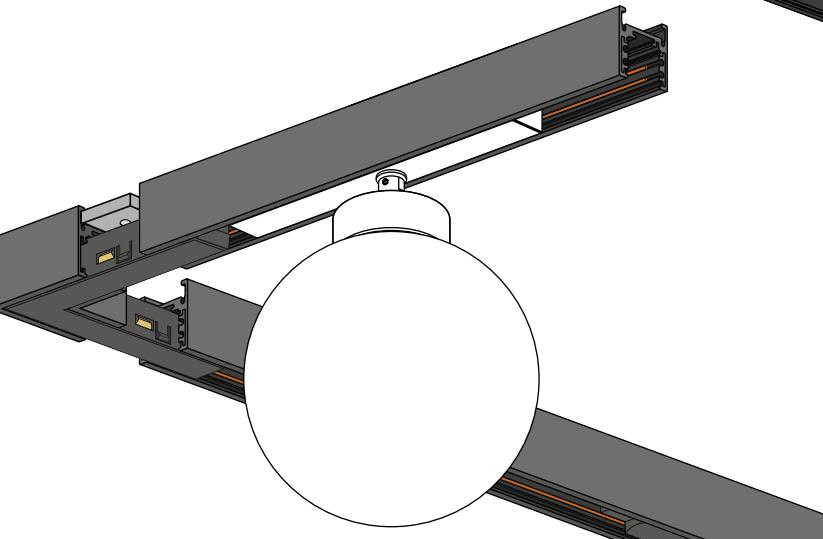

## Flexibility in a simple form

The MULTITRACK system is available in surface-mounted, suspended and recessed versions, as well as in two depths.

Available accessories and connectors allow you to create complex systems, even with a direct transition from the ceiling to the wall.

There is a safe voltage of 48V inside the track, so the MULTITRACK system can also be used in places within easy reach.

The MULTITRACK system requires a separate power supply. It can be installed in a suspended ceiling or in built-in furniture. Another solution is to use the power supply in a surface-mounted box mounted on the ceiling and constituting an extension of the track. There is also a power supply plugged directly into the track (exactly the same as the luminaires), as well as a power supply mounted on a DIM track in the distribution box. There are plenty of possibilities. Each of them requires slightly different electrical installation.

## The most subtle track system on the market

Due to its extremely small dimensions, measuring only 6.7mm in height and 18mm in width, the FLATTRACK system is available exclusively in surface-mounted versions. With a safe 48V voltage, it can be confidently installed on walls.

With lengths of tracks reaching up to 3m, a set of accessories and a wide selection of lighting fixtures for the FLATTRACK system, there is flexibility to create diverse arrangements within interiors.

Copper wires run along the sides of the tracks, graphite-coated, making this system not only exceptionally discreet but also aesthetically pleasing.

NEW PRODUCT

# Flattrack

# Microtrack

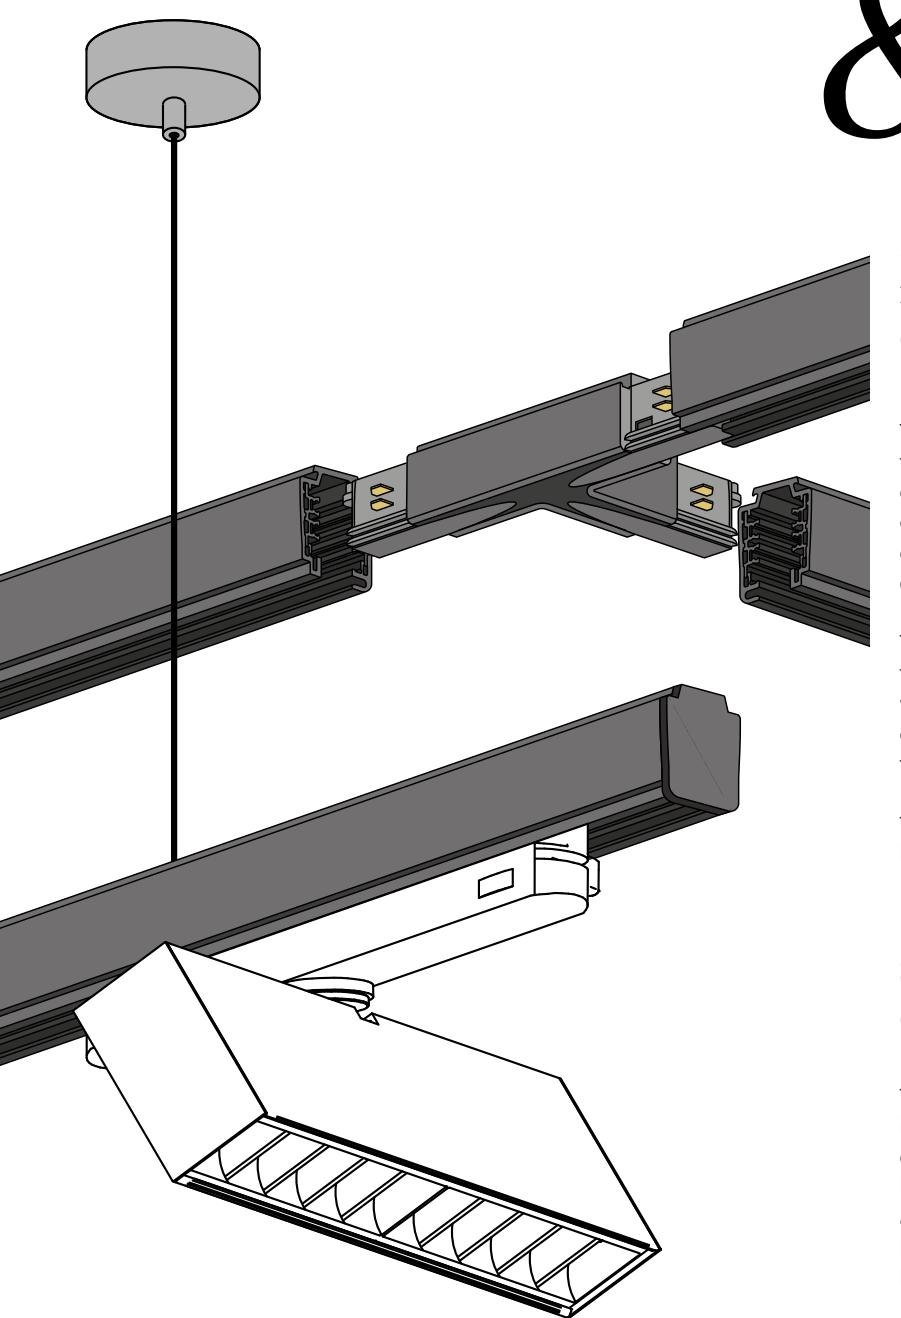

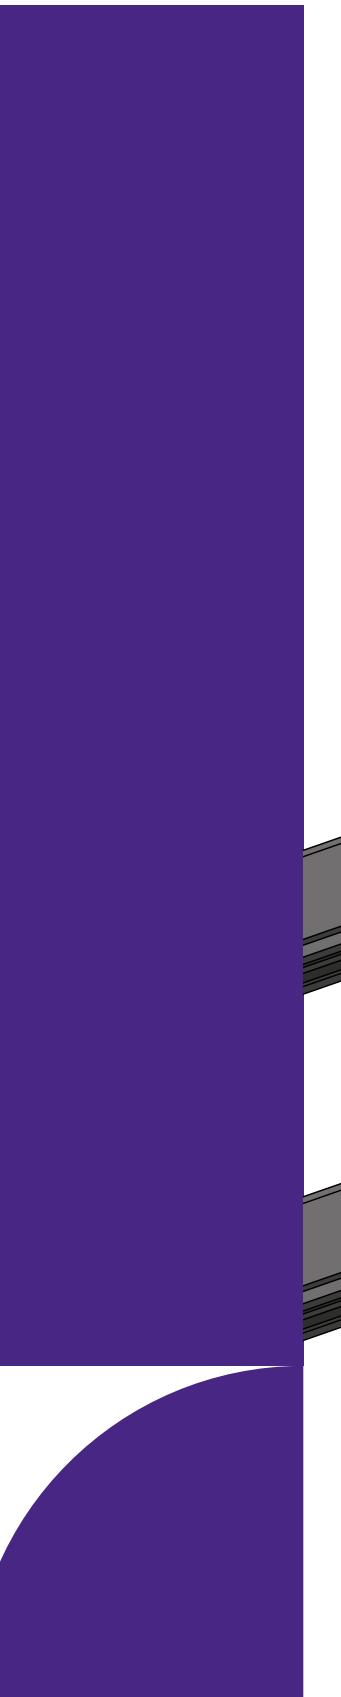

NEW PRODUCT

**Exceptionally discreet  
form with numerous  
possibilities**

The track systems of the MICROTACK are available in both recessed and surface-mounted versions. Their compact dimensions allow for the creation of exceptionally subtle compositions on the walls and ceilings.

Lighting fixture adapters are inserted into the middle of the track, seamlessly integrating with the discreet line of the tracks themselves. A complete set of accessories and a wide selection of fixtures provide ample creative freedom.

Safe 48V voltage allows for convenient installation within reach. It requires the use of a separate power supply, available in various versions - with a surface-mounted box for installation in a suspended ceiling, as well as for installation in a distribution box.

**3F tracks combine flexibility, minimalistic design and affordable price**

They are powered by 230V, so to connect them, all you need is a standard cable on the ceiling and a power terminal or one of the connectors with the possibility of connecting the power supply (straight connector, "L", "T" or "X").

They make it possible to divide lighting fixtures into up to three circuits so that they work independently. This requires a 5-wire cable between the wall switches and the track connection.

They are made of aluminum profile painted black (RAL 9005) or white (RAL 9003).

**Standard tracks for demanding interiors**

The DALI version of the 3F tracks is intended for interiors where a wired digital control system based on the DALI protocol is used. This solution allows for independent addressing of the luminaires. In other words, it is possible to program light scenes, dim luminaires and combine them into groups.

The 3F DALI tracks require the use of fixtures in the DALI control version, as well as appropriate installation and the use of properly selected automation.

# TRIBA

## Decorative form and precise light

TRIBA is precise optics and high quality of light enclosed in a decorative, three dimensional form.

Two diameters, lighting angles from 18 to 50°, luminous flux from 510 to 1210lm allow you to easily select the appropriate luminaire model.

High light parameters, including CRI>90 (or even CRI>95 on request) and uniform light colour (SDCM3) will ensure the highest quality lighting. And the expressive, milled shape will add character to the interior. TRIBA attracts attention and shines well.

ŚWIECENIA

The PET mini model provides a sufficiently large luminous flux to highlight the most interesting elements in the interior. Carefully designed optics of PET luminaires as well as appropriately selected light parameters allow for low glare in the interior and high visual comfort.

Thanks to high levels of luminous flux and various lighting angles, PET luminaires are perfect for many applications: in homes, shops and public spaces. They can be equipped with optional accessory – a honeycomb. PET frames are available in many colour versions, including mixed versions in which the decorative ring is a different colour than the body. For supporters of more classical solutions, we have a version with a traditional light source with an equally minimalistic design.

Data for standard LED product is shown for LED light source 3000K. Other variants are available on our website.

Lots of possibilities  
in a small form

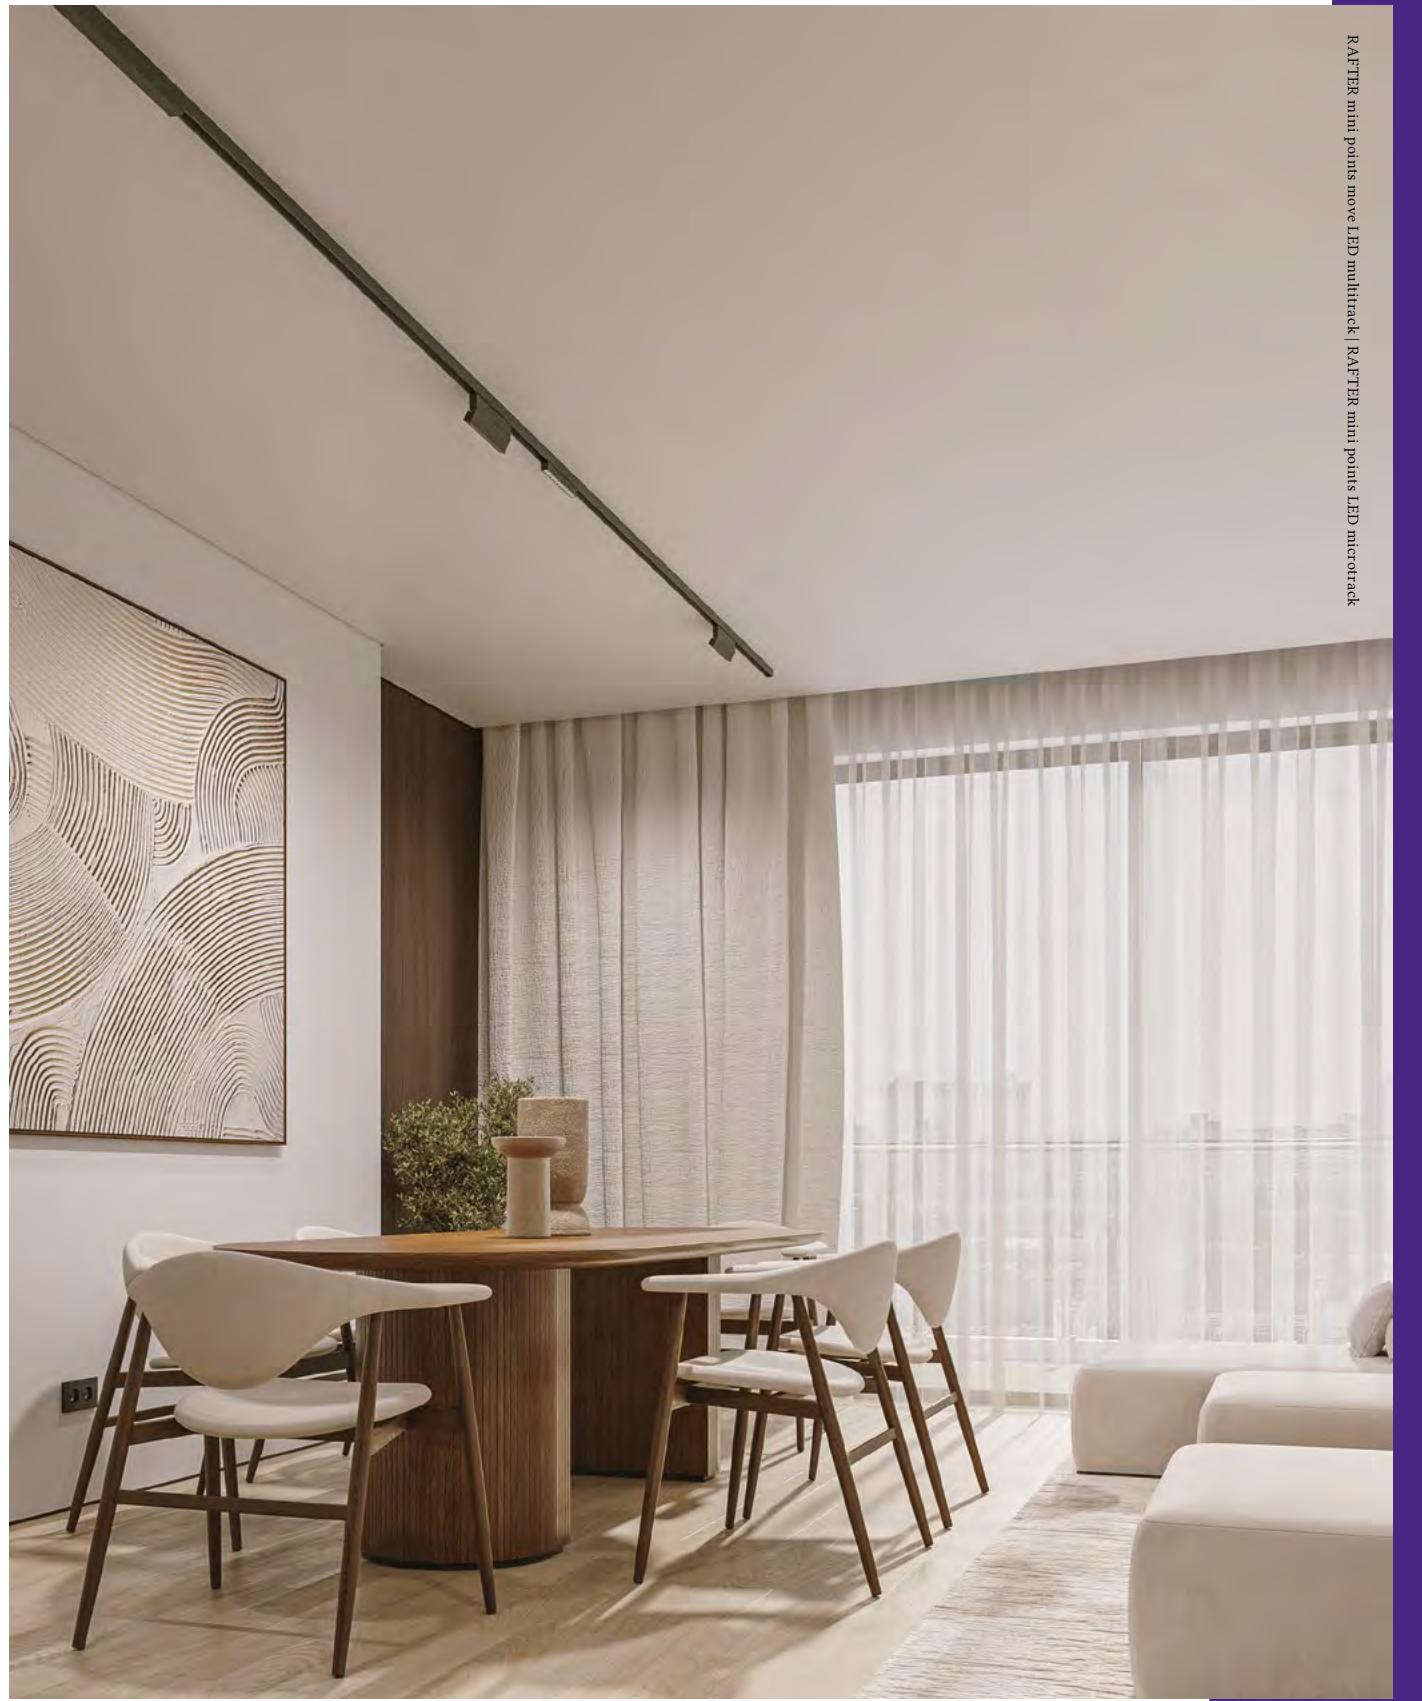

# Rafter

RAFTER mini are versatile fixtures that, despite their small size, can do a lot. The move versions guarantee almost unlimited freedom to direct the luminaire to any place in the interior. Fixtures with a reflector provide precise accent lighting, and models with a milky cover offer diffused light in a larger space. All this, in a minimalist form, which is an interesting addition to modern interiors.

The RAFTER model with a milky cover is a great way to provide even general lighting in the interior or to accentuate a larger space with light.

RAFTER points offer high visual comfort for interior users and precise lighting of selected places in the room. Thanks to the deeply embedded diodes, it provides a high shielding angle and allows for low glare in the interior. It is perfect both as a layer of task and accent lighting, for instance pictures, bookcases or countertops.

## Simple form and unique functionality

SET TRU mini are linear fixtures with a slim form, designed for MULTITRACK. They are available in two lengths and optics variants. The first one is a milky opal cover providing diffused light, ideal as general lighting. The second one is the points variant, providing directional light that precisely illuminates the work surface or the floor directly under the fixture.

The SET TRU family of luminaires for track 3F introduces many new possibilities in the lighting of private and commercial interiors.

## Quality, simplicity and style

MODERN BALL simple is a combination of classic form and modern LED technology. The evenly illuminated lampshade emits a lot of light in all directions without dazzling. This provides exceptionally comfortable light throughout the space. It even illuminates the ceiling, resulting in soft light reflected from its surface.

MODERN BALL simple arranged on tracks add character to both modern and more classic interior arrangements.

# NEW PRODUCT

# Triba

A harmonious duo  
of great parameters  
and decorative form

The TRIBA collection combines modern technology with decorative form. Thanks to hybrid optics and an increased shielding angle, the luminaire ensures visual comfort and at the same time boasts outstanding efficiency, without compromising the quality of light. A large power range, two diameters, several lengths and installation versions to choose from make TRIBA easy to adapt to the individual needs of private and public spaces.

Meet the stylish wall lamp that will take care of the mood in the interior

Some places are all about the mood. An atmospheric restaurant, a cafe or a modern hotel require an appropriate lighting. IKI round wall luminaire is in a decorative original form that emits subtle light and so it provides a discreet atmosphere in the room. The collection was created in cooperation with Andrzej Klisz – a professor at the Academy of Fine Arts in Katowice.

### Create a moody ambience with light

MODERN GLASS is an elegance hidden in a minimalist, timeless form. It was created in cooperation with the Czech design studio DECHEM. Handmade glass, in the form of a slender tube, is a decorative element of the interior. In the hermetic version, with IP43, the luminaire will prove useful as a mood lighting for the bathroom.

### Reach for an unconventional addition to modern arrangements

GRAPH collection proves that minimalistic design does not have to be boring. Surprising form and the ability to shine up&down, guarantee an amazing effect. Alone, the luminaire is an interesting lighting accent, while in a group, it paints original patterns on the wall. GRAPH, is not only a stylish addition to the arrangement, but above all a specialist in building the interesting mood in the interior.

## A discreet ally of moody interiors

How to ensure coziness in the interior? It is worth betting on the right lighting to create a unique atmosphere. CAMBER collection will perfectly cope with this task. The minimalistic form is a discreet decoration of modern interiors, and the subtle light will work as a delicate lighting accent or as soft side lighting. As a result, a romantic dinner for two or an evening screening of your favorite TV series will now become even more pleasant!

## Bet on an aesthetic accent in the interior

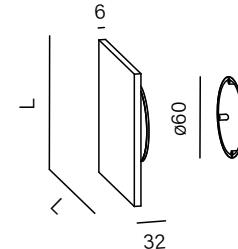

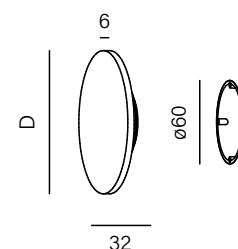

Circle or square? The MAXI POINT collection surprises with a variety of forms, encouraging you to play with the composition. Alone or in group, it is an interesting lighting accent. Subtle, softly spreading light on the wall is a luminous signpost in passageways. Moreover, MAXI POINT in the 8cm version will successfully cope as a discreet staircase lighting.

Pet micro

Lighting often accompanies us from the first moments right after waking up, until the end of the day, when we go to bed again. At this time, the PET micro, created for keen evening readers, will be perfect. Mounted by the bed, thanks to a movable element, allows you to precisely direct the light right to next pages of your book. Moreover, the excellent technical parameters provide the highest reading comfort, without illuminating the space around.

## Learn an effective way to illuminate a mirror

Some cosmetic procedures, such as shaving or makeup, require true precision. So it is worth taking care of the appropriate lighting. This task will be perfectly handled by the THIN TUBE collection, which is known for its sleek, slender form with a diameter of only 4cm! Efficient wall lamp will effectively illuminate a mirror with a width of 30cm to even 150cm, and the updated optics will even better illuminate the face, allowing you to see every detail.

## Opt for efficient table lighting

The MROOM collection is a proposal for efficient table lighting that stands out due to its exceptional durability. Thanks to its easily replaceable battery, the passage of time does not affect it, making it suitable for commercial spaces like hotels or restaurants. MROOM features touch controlled power adjustment and one fixture can illuminate a small table for up to 4 people. Its high IP65 waterproof rating allows the fixture to be used both indoors and outdoors.

## Timeless design and excellent parameters

The MODERN BALL collection embodies design classicism that has firmly established itself in interiors. Its glass sphere serves as a timeless ornament, while the milky glass ensures the highest visual comfort for users. Softly diffused yet remarkably efficient lighting effectively illuminates tables, shelves or desks. Hence, MODERN BALL is a versatile choice suitable for both private and public spaces.

### Lighting that cares for your eyes during evening readings

The popular PET collection has seen numerous iterations. This time, available as a stylish floor lighting, it comes to the aid wherever efficient lighting is needed for an evening relaxation with a favorite book. PET micro works wonderfully, for instance, in a living room, effectively illuminating the pages of a book or as stylish supplementary lighting in hotel lobbies or office receptions. Its slim, minimalist form, typical for this family, serves as a subtle design accent, certainly adding to its style.

# Hollow

## Discreet and effective

HOLLOW is the discreet companion for any interior facing heightened moisture levels. With an IP65 rating, it performs exceptionally well in bathrooms, even when exposed to direct streams of water. Despite its compact size, it can illuminate extensive spaces. HOLLOW is a simple fixture that conceals a deeply embedded light source, ensuring glare protection despite its fairly wide 40° beam angle.

### Embrace timeless elegance

MODERN BALL embodies a blend of classic and elegance encapsulated in a single collection. Milky glass spheres emitting softly diffused light serve as a timeless interior decoration. The hermetic version, boasting an elevated IP54 waterproof rating, presents an excellent choice for bathrooms. It works well as general lighting or as mirror illumination. With a high colour rendering index (CRI>90) and glare protection, it serves as a proven solution for lighting public and residential spaces.

## Impact and ingress protection

The BLOS collection, with its IP54 rating and IK10 mechanical resistance, is perfect for general lighting, even in harsh environments. What is more, the luminaires can be controlled using DALI protocol or AQsmart - the wireless system as well as equipped with sensors, and their installation is extremely easy.

### Proven way to illuminate the bathroom

MODERN GLASS encapsulates elegance within a minimalist, timeless form. This collection emerged from a collaboration with the Czech design studio DECHEM. Handcrafted glass, in the form of slender tubes, serves as a decorative element in interiors. With an IP43 rating, the hermetic MODERN GLASS is resistant to splashes, making it ideal for creating a mood-enhancing ambiance in bathrooms.

## An effective way to illuminate mirrors

Certain cosmetic procedures demand exceptional precision. Therefore, it is essential to ensure adequate lighting for the person standing in front of the mirror. This task is well-handled by THIN TUBE. The twist version, with updated optics, excellently illuminates the face, allowing even the tiniest detail to be seen. This makes tasks like applying makeup or shaving even simpler.

LEDPPOINT round up&amp;down exterior wall | SLUP LED exterior upright

### Embrace accent lighting

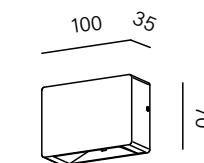

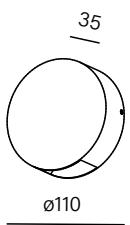

The facade of a house serves a representative function, making proper lighting essential. This is where LEDPOINT excels – a small wall lamp that (especially when grouped) paints original patterns with light, bringing the facade to life after dark. You have two fixture versions to choose from: round and square, both with precise light directed downwards, upwards or both.

# Vip

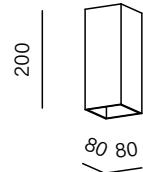

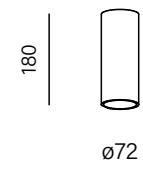

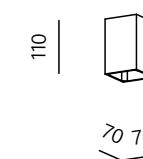

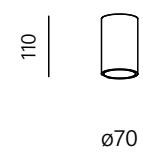

## Facade lighting specialist

How to add the right glow to your facade? Simply ensure proper accent lighting. This is where the collection of atmospheric VIP lamps excels, painting decorative patterns on the wall. The fixture is available in the form of slender tubes or rectangles. Depending on the chosen version, VIP can direct light downwards, upwards or both.

# Index

MODERN BALL simple midi LED spider suspended | RAFTER mix LED recessed

ŚWIATŁO  
IDEALNIE  
DOPASOWANE

The systems allow you to configure an individual solution that is based on standard families of AQForm fixtures. Linear models use elements of the MIXLINE, TRU and RAFTER series – modules with a milky cover, lenses and reflectors, supplemented with non-luminous and power sections. Individual elements can be connected together in a line, at an angle, and in selected systems it is also possible to move from the ceiling to the wall. Different sections or groups of sections can be controlled separately – depending on the individual layout. There are also recessed, surface-mounted and suspended versions to choose from.

# Systems

Profile systems also allow you to create thin lighting lines of various sizes and strengths. These are the RAW mini, ALULINE, PIPER, MIXLINE, RAFTER, TRU and LEDLINE SOFT models.

The SPIDER system allows you to combine many suspended luminaires or wall lamps with a selected mounting box into one spectacular form.

PET rift and PET mini rift are systems that allow you to create suspended, surface-mounted or wall lamp models with various lengths and different finishes for each element.

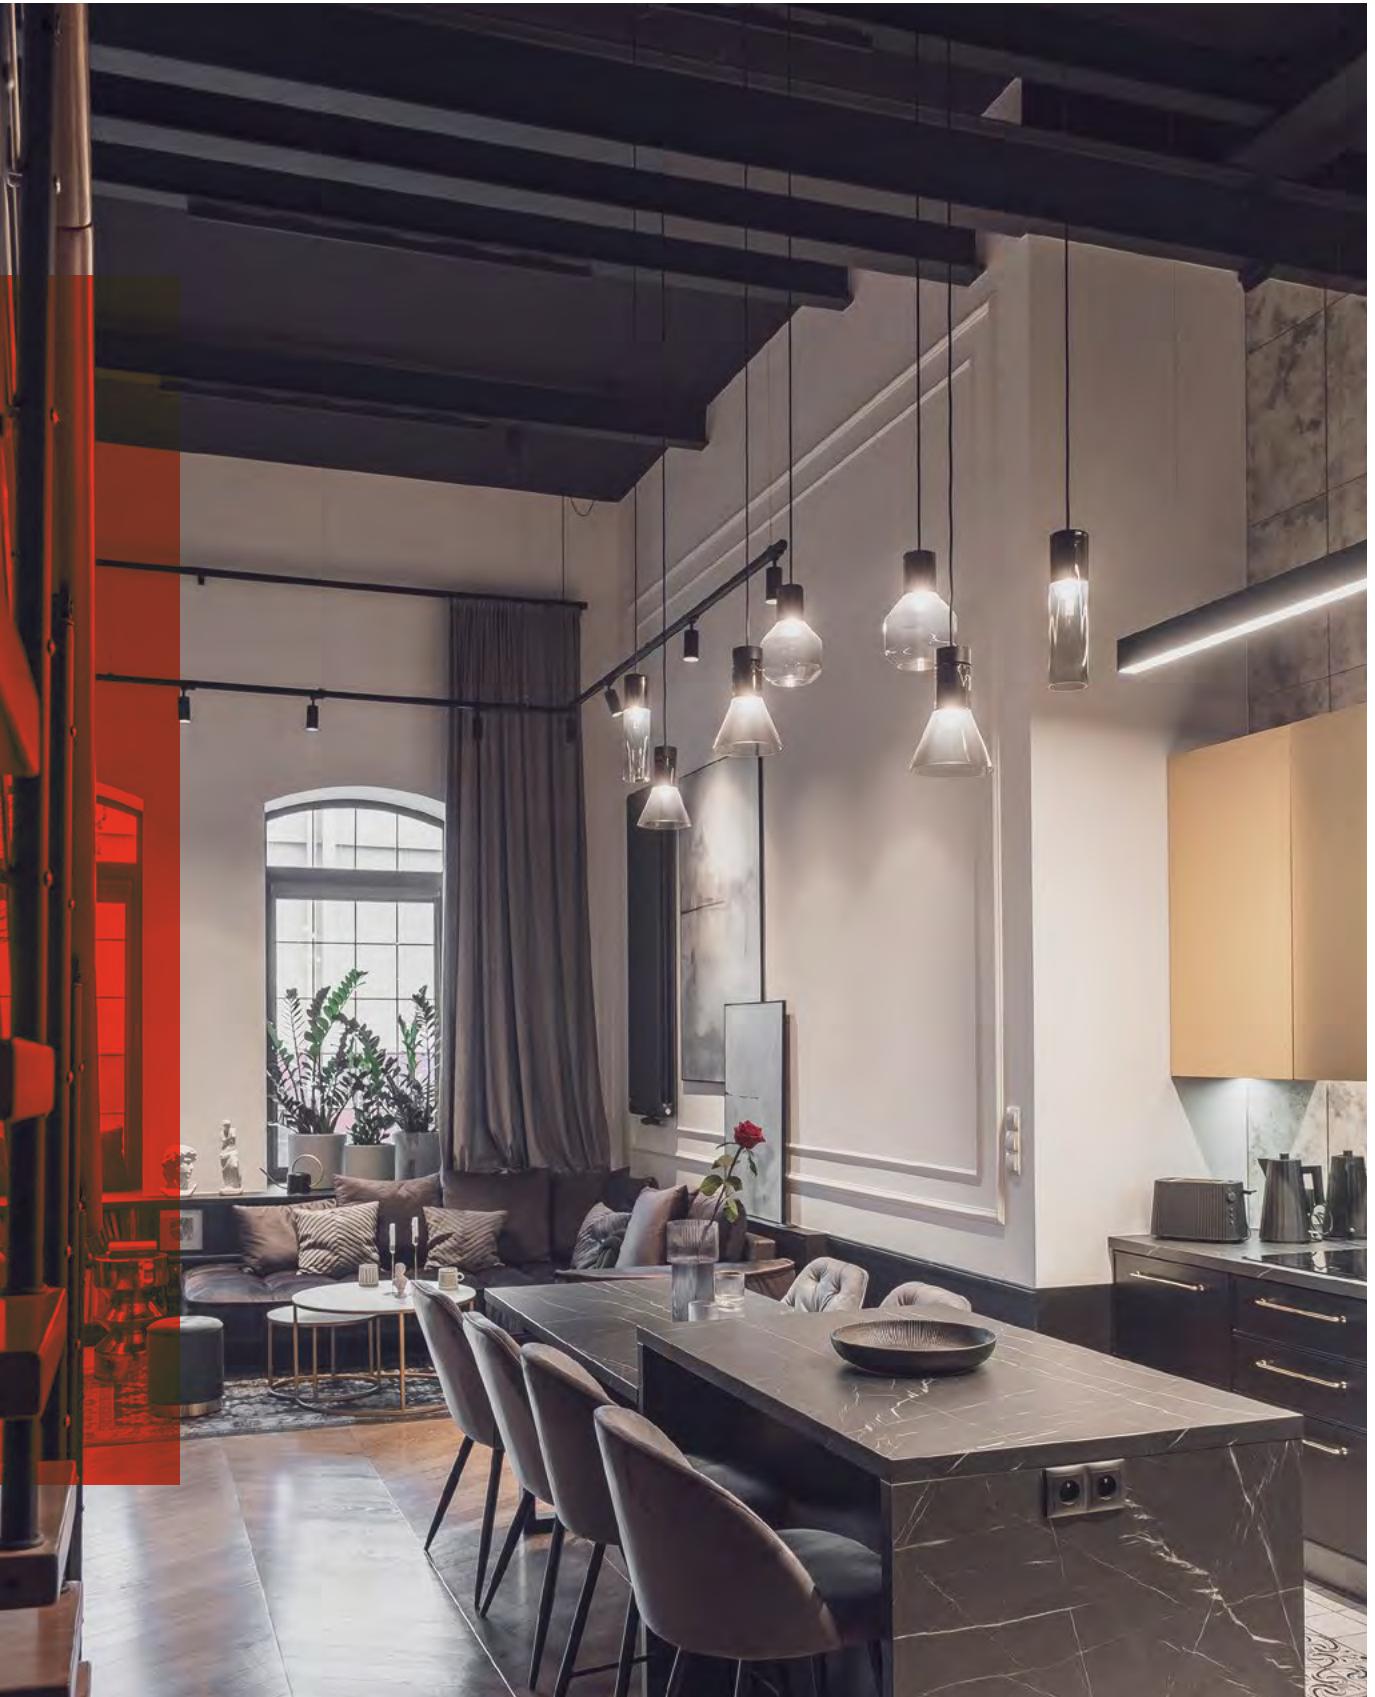

The systems are individual, tailor-made solutions, yet based on proven components.

# Spider

Mix, match, arrange, expand

The SPIDER system allows you to connect 2 to 8 devices, including additional boxes, to one mounting box. Suspended models and wall lamps, decorative in form or minimalistic, can be connected to one of many versions of a round or strip ceiling with a power supply. Additional mountings for power cables allow you to mount and arrange the luminaires in almost any way that suits the interior.

# How to use system

Combining standard components into non-standard configurations – this is the idea behind systems. Modules with covers, spotlights, reflectors. Non-luminous, power supply elements. Suspended and surface-mounted luminaires, wall lamps. Power supply boxes of various shapes and the number of possible connections. All these elements and how to configure them are presented on the following pages.

## 1. Choose luminaire module

Select the shape, finish and colour of the luminaire for the SPIDER system.

## 2. Choose lamp canopy

Choose the size, colour and finish of the lamp canopy. More holes or non-standard arrangements are possible. Remember that more than one lamp canopy can be joined together. For versions of x6, x7 and x8 – check out our website.

	x2 2 holes	x2 side 2 holes side	x3 3 holes	x3 side 3 holes side	x4 4 holes	x4 side 4 holes side	x5 5 holes	x5 side 5 holes side

SYSTEMS

Suspended p.198

The PIPER system is based on lighting tubes suspended on thin cables, providing diffused and soft light. It allows for easy connection by using flexible, plug-in connectors. One power source on the ceiling or wall is sufficient to connect multiple fixtures. An additional advantage of the system is the ability to choose one of three colour temperature values using the switch mounted on each fixture.

# Aluline

## Infinite lines without bright spots

The system allows you to create continuous light lines on the ceiling and wall. The profiles are equipped with opal covers and LED strips providing continuous light. They can be connected into any straight or broken sections.

The system is prepared for an individual request.

It is available in two recessed versions (with frame and frameless) and surface-mounted.

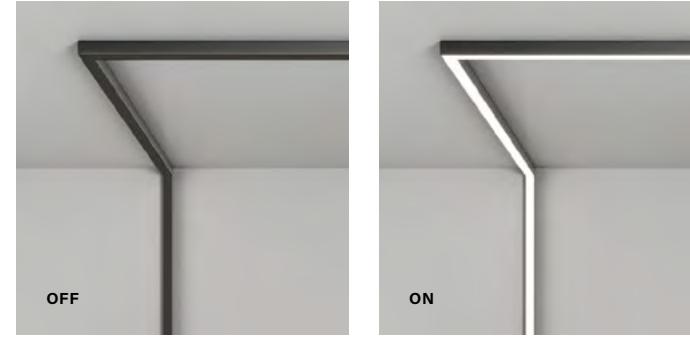

# How to use system

The system allows you to create continuous light lines on the ceiling and wall.

The profiles are equipped with opal covers and LED strips providing continuous light. They can be connected into any straight or broken sections.

The system is prepared for an individual request. It is available in two recessed versions (with frame and frameless) and surface-mounted (mini and midi).

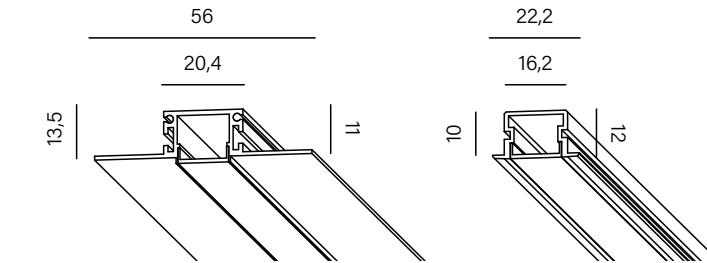

On request, you can order ALULINE with black cover. When turned ON, it shines evenly.

# Mixline

The system can be composed of modules equipped with lenses, opal diffuser and PET reflectors. Additionally, there are non-luminous sections and power supply sections, which must be appropriately selected to the length of the system.

Straight and angular connectors and wall-ceiling elements allow you to create various configurations.

The MIXLINE system is available in recessed, surface-mounted and suspended versions.

# Tru

## Reliability, resourcefulness, agility, and unwavering commitment

TRU uses profiles and technology used in SET TRU family fixtures. This is a very efficient system that will serve well as general lighting even in large spaces. Elements can be connected together into complex structures using dedicated connectors. The system offers two types of covers – standard opal and microprismatic (PRO version), which allows for low glare and high visual comfort. Two power variants, different types of control, including AQsmart, three different colour temperature values to choose from, and the Tunable-White version allow you to create a professional lighting system perfectly suited to the interior and the needs of users.

# PROSTA FORMA

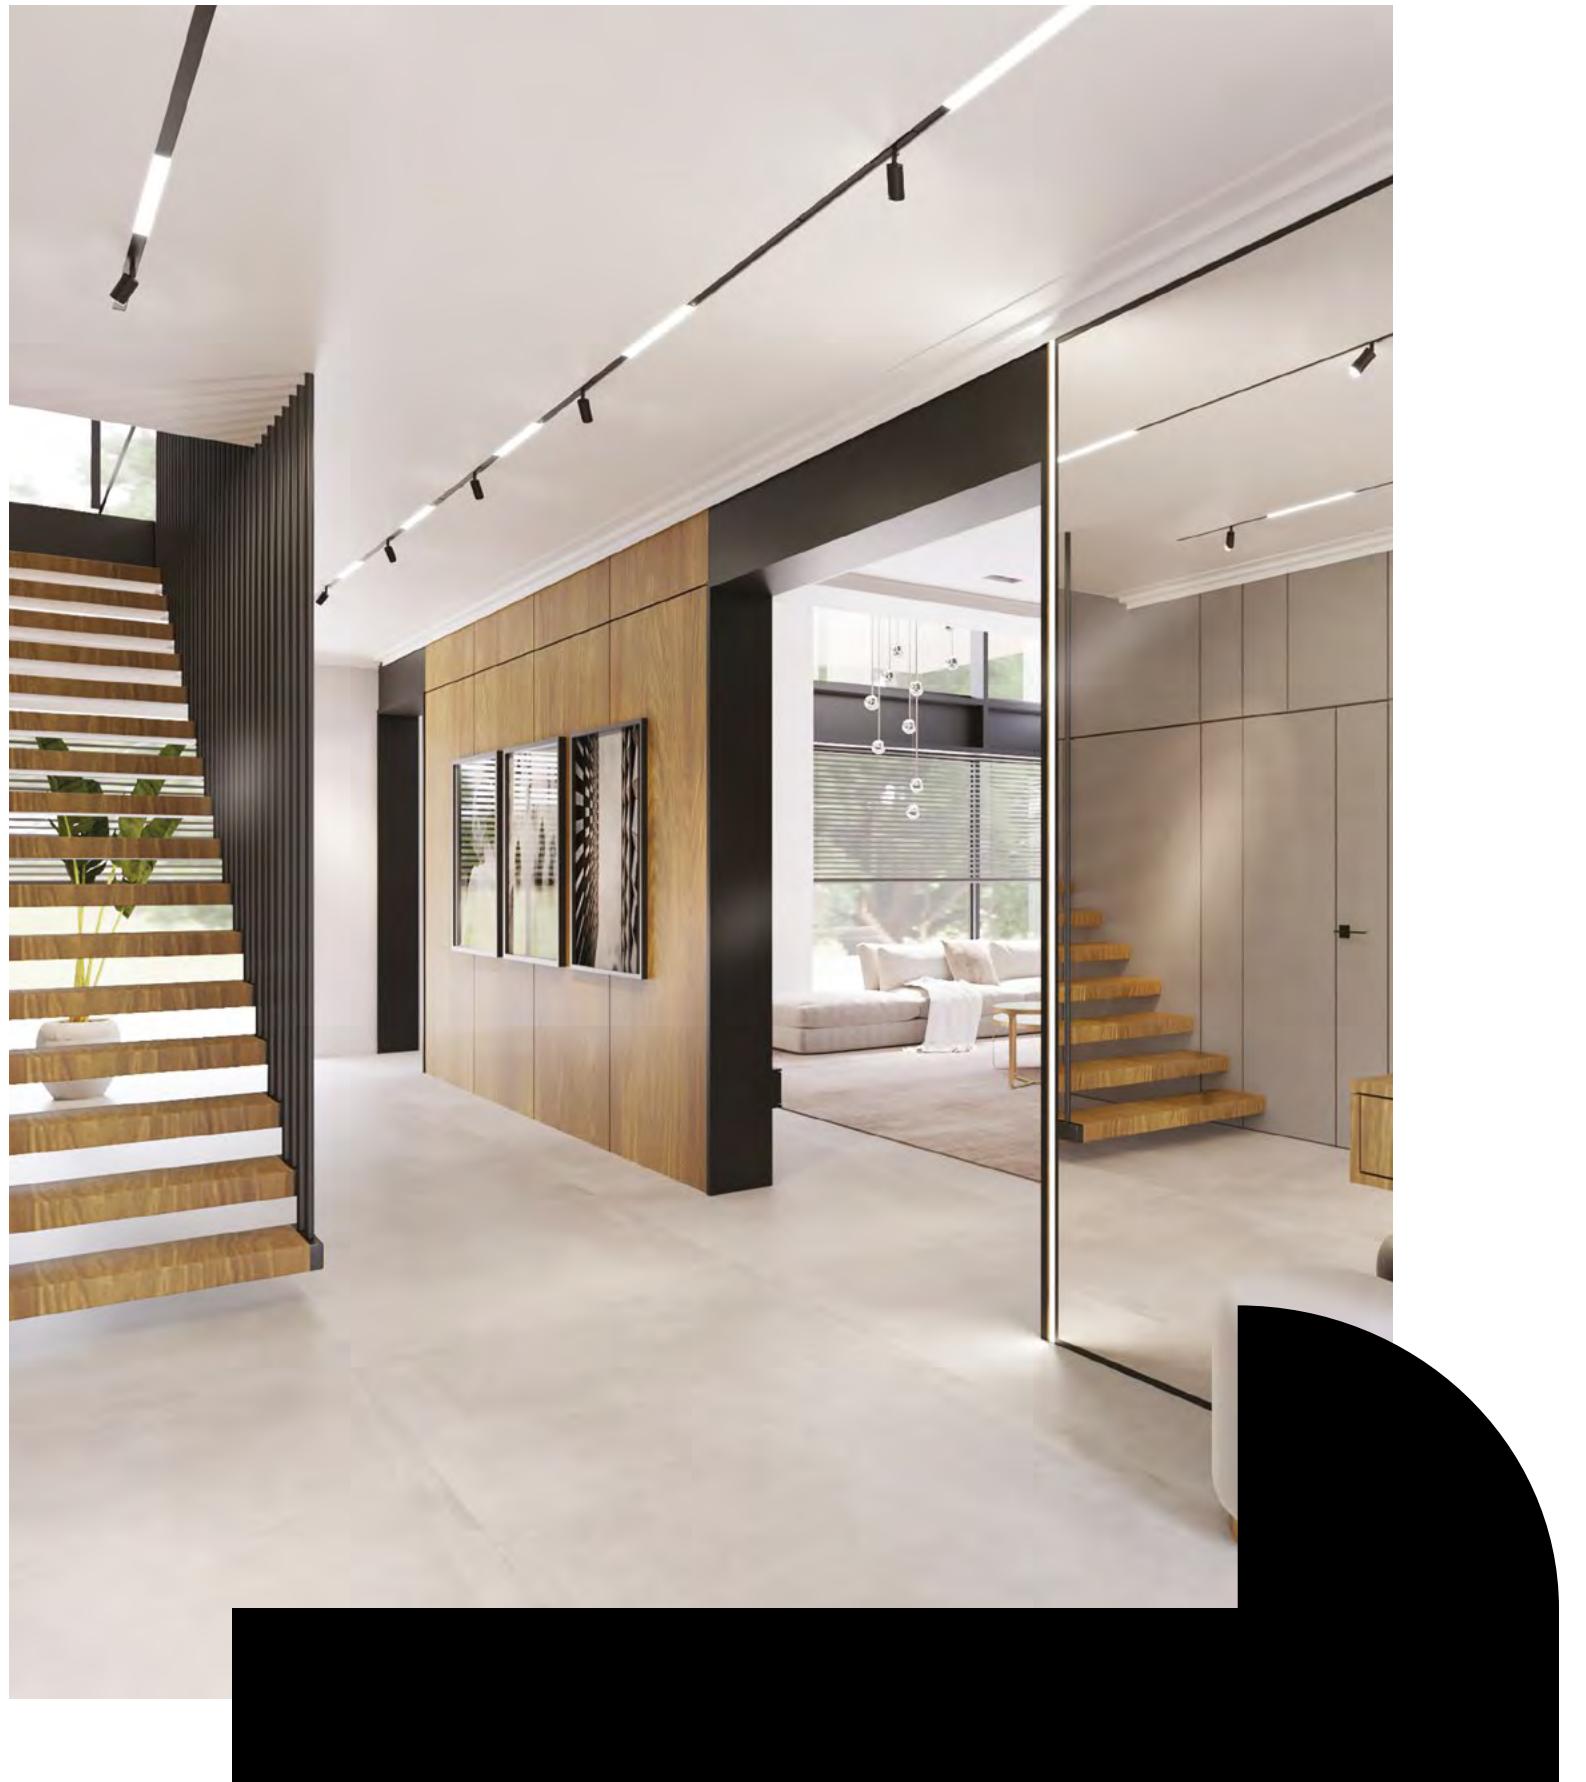

## Rafter

An extensive system based on luminaires from the RAFTER family, in which it is possible to connect components providing very different ways of lighting. It is available in three installation versions: recessed, surface-mounted and suspended.

The RAFTER mix system can be composed of three different lighting elements. Points modules provide directional light straight down and achieve low glare. Modules with an opal cover work well as soft general lighting. And PET LED elements are a good solution for accent lighting.

The RAFTER system is based on profiles with an opal cover, which allow you to compose long luminous lines and connect them at right angles. Three power versions and four control options are available and make it possible to precisely adjust the amount of light to a specific room.

All dimensions and technical data in catalogues are provided for a guidance purposes only. Actual data may differ slightly due to the production process. Technical information contained within Aquaform's website, data sheets or mounting instructions shall prevail over the information contained in catalogues. Aquaform Inc. reserves the right to change the presented materials and product specifications without prior notice.

Aquaform Inc. takes no responsibility for any possible misprints. All photos, icons and images are copyright protected. Images are illustrative presentations of products and colours. Due to the production process RAL colour of white track and adapter differs a few tones from a standard white finish of AQForm luminaires.

Information contained in the catalogue shall not constitute an offer, also within the meaning of art. 66 § 1 of Polish Civil Code.

All rights reserved.

Podane w katalogach wymiary oraz informacje techniczne mają jedynie charakter informacyjny. Rzeczywiste dane mogą się nieznacznie różnić ze względu na proces produkcyjny. Informacje techniczne zawarte na stronie www, w kartach katalogowych oraz w instrukcjach montażu mają pierwszeństwo przed informacjami z katalogów. Aquaform Inc. zastrzega sobie prawo do zmiany przedstawianych materiałów i parametrów technicznych produktów bez wcześniejszego powiadomienia.

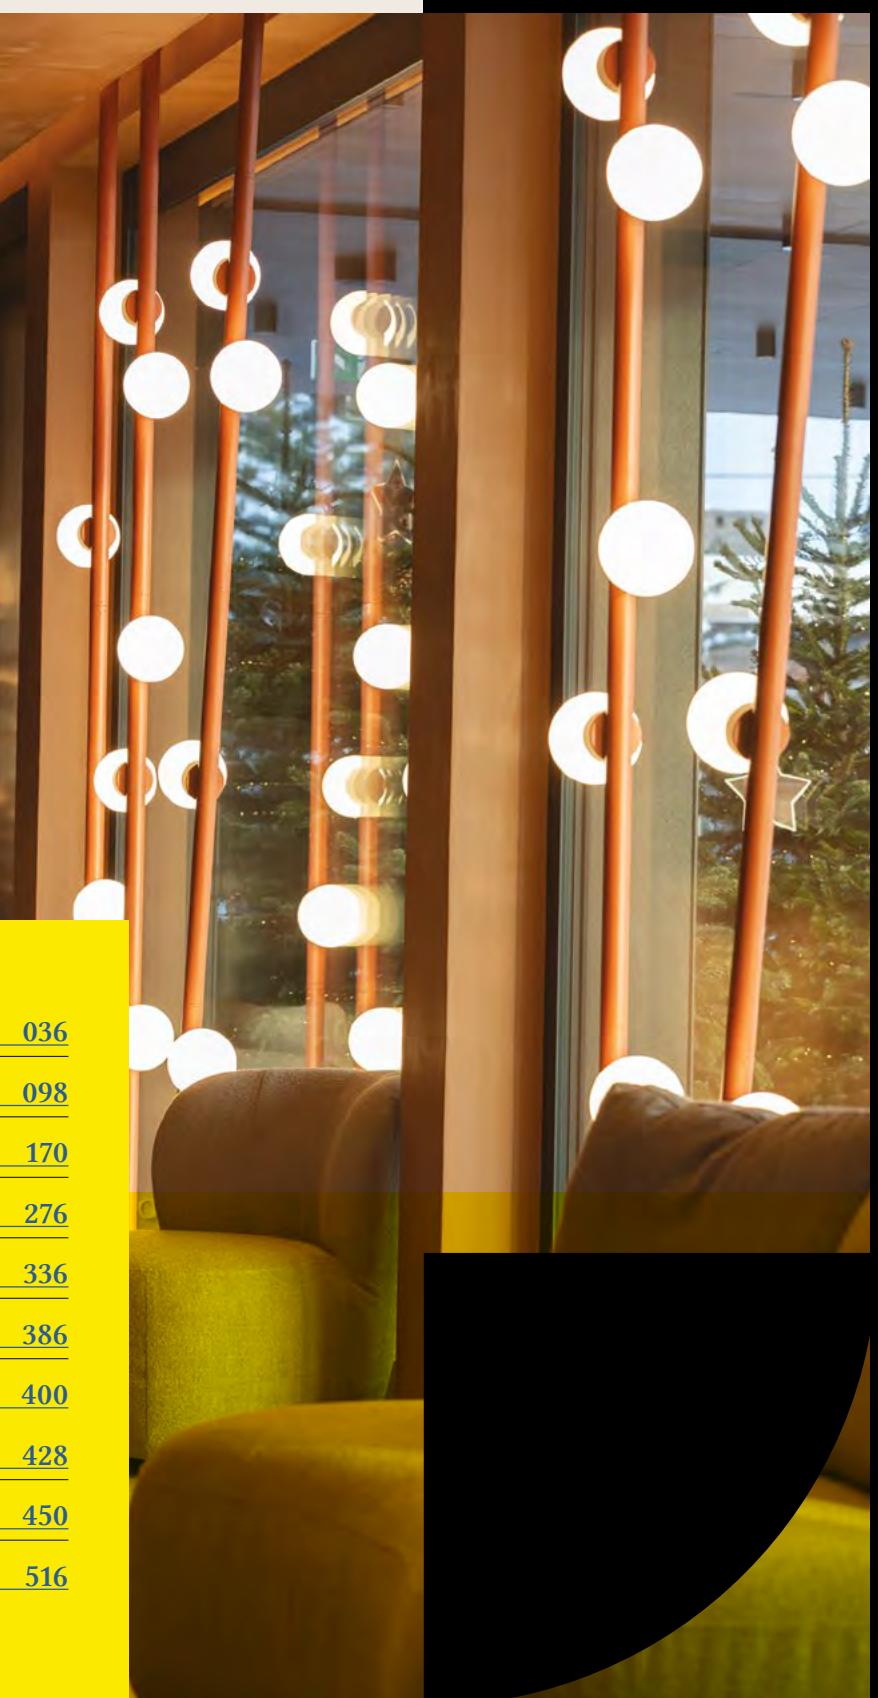

Aquaform Inc. nie ponosi odpowiedzialności za możliwe błędy w druku. Zdjęcia są chronione prawnie. Na zdjęciach pokazane jest poglądowe przedstawienie produktów oraz kolorów. Ze względu na proces produkcyjny kolor RAL białych szynoprzewodów oraz adapterów różni się o kilka tonów od standardowego białego wykończenia opraw AQForm.

Informacje zawarte w katalogu nie stanowią oferty handlowej, w tym w rozumieniu art. 66 §1 Kodeksu Cywilnego.
